NEWS IN BRIEF

Xerox after Microdata?

THE mystery suitor for US minisuper Microdata has still not been unmasked, but UK sources name Xerox and IIT as prime candidates. If Xerox is interested, it will represent an ironic about-turn for the company, which closed down its Xerox Data Systems operations in 1975, and subsequently passed the base on to Honeywell.

Xerox Data Systems manufactured and marketed a highly-regarded minicomputer, the Xerox 530. The growing interest at Xerox in the automated office market makes an in-house minicomputer capability particularly desirable.

WP software

A SOFTWARE package supporting word processing on the IBM System/34 has been developed by Gordon Brownhill Computer Services, of Warrington. The system caters for mixed upper and lower case printing, left justification with an IBM-supplied 96-character print belt.

Doctor's authority

TO oversee controls on medical records, a doctor should be included in any Data Protection Authority that is set up, according to a resolution passed at the British Medical Association annual meeting. The doctor should be a clinician in active practice, as distinct from someone working in, say, community medicine. It was agreed, and he should have experience of computers.

German group

GROWING interest in BCPL in the German-speaking lands has led the University of Regensburg Computer Centre to organise a BCPL users meeting in Regensburg, West Germany, for July 12. Given sufficient interest, a German BCPL user group will be formed to complement the similar UK group formed earlier this year (Software File, March 15).

CRANFIELD COMPUTER SERVICES LTD.
COMPUTER HOUSE
49-53 Bellegrave Road Welling Kent DA16 3PB
Tel: 01-304 8326 Telex 896138

CRANFIELD is a company offering a TOTAL range of supplies to the computer user

OUR RANGE OF PRODUCTS INCLUDES:

- COMPUTER LISTING PAPER
- PRE-PRINTED COMPUTER FORMS
- TERMINAL ROLLS AND CONSOLE STATIONERY
- MAGNETIC MEDIA AND ACCESSORIES
- MAINTENANCE TAPE AND DISC CLEANER/CERTIFIER
- PRINTER RIBBONS
- PRINT OUT BINDERS
- PAPER TAPE AND ACCESSORIES
- FORMS HANDLING EQUIPMENT
- TABULATORS
- COMPUTER ROOM FURNITURE
- FIRE PROTECTION EQUIPMENT
- FOR DATA RECORDS
- COMPUTER CABINETS FOR VALUABLE MEDIA
- COPIES DISKS

It is impossible to list our complete product range which covers ALL requirements. Should YOUR requirements not be mentioned contact us, and we will be pleased to give every assistance.

We offer only QUALITY products with PROMPT delivery at a competitive price.

Honeywell denies pull-out from CII-HB

FIRMLY squashing growing speculation in Paris that moves are afoot to increase the French shareholding in CII-Honeywell Bull, Honeywell says its stake in the jointly-owned company is not for sale.

"Honeywell considers its 47% ownership of CII-HB an excellent investment and has no intention of reducing its share," a spokesman at corporate headquarters in Minneapolis told Computer Weekly.

Speculation has arisen because industrial conglomerate St Gobain Pont-a-Mousson is actively seeking a stake in CII-HB, either directly or through Compagnie des Machines Bull, the French company which holds 53% of the shares in CII-HB.

Since Honeywell has firmly ruled out the

first option, adding that it is not in any way involved in the St Gobain negotiations, all that is possible is a restructuring of the existing shareholdings in CMB.

Of the total 60% is held by the public at large — and St Gobain could try to acquire some of these. Another 20% is held by the French state directly, and is almost certainly not for sale. The remaining 20% is held by another holding company, Opagex, in which the big French electrical and electronic combine CGE has 51% of the shares while a consortium of banks holds the remainder.

There has been speculation that CGE might be prepared to sell its stake to St Gobain. Although CGE is understood to be

dissatisfied with the direction CII-HB has been taking, this seems unlikely.

Since the merger between CII and Honeywell Bull in 1976, CII-HB has succeeded in turning itself into a very broad-based company with no identity distinct from that of Honeywell. Major decisions taken in France include the acquisition of 60% of microcomputer pioneer IZIF, the establishment of a joint company with systems house SESA for the implementation of complex large-scale computer projects, and a decision to seek acquisitions in the office automation field.

A broader spread of Honeywell computers is now manufactured or assembled in France than in any other country, including the US.

Lloyds pay out huge sums on leasing policies

UNDERWRITERS at Lloyds of London are having to pay out considerable sums as a result of claims under the controversial "J" policies written for third party lessors of IBM equipment in the US, although the corporation said that no firm of underwriters would be forced with "an individual claim of any great magnitude".

Earlier this year Lloyds estimated that the claims under these policies would total about \$200 million, but industry sources have said it could be considerably more. The biggest user of the policies, Ite, is understood to have claims of more than \$100 million outstanding.

There are 17 third party lessors with "J" policies in the US, and Lloyds said the claims were being borne by 60 firms of underwriters and several other insurance companies.

The claims started to come in 1977, three years after Lloyds started writing the policies, and fresh claims will continue to be made until the end of this year (CW, December 8, 1977), three years after the last policies were issued.

By the end of next year nearly all the equipment covered will have reached the point where the three-year break clause in the original leasing contract can be invoked by the lessee, the consequences of which the "J" policy is intended to guard against.

Payments to lessors who have

Distributed processing has been introduced at the Central Electricity Generating Board, North West Region, in the form of a CMC Sovereign multiple processor keying system. As well as being used for data entry to the board's IBM mainframes, the Sovereign will carry out critical path analysis, work planning, and plant reliability studies.

UK Apple dealers' concern about future

A NEWLY formed Apple Dealers Group is to send a representative to the company's headquarters in Cupertino, California, next week, to try and get a statement from the company on the Apple distributorship situation in the UK.

The group, formed partly in response to the appointment of Data Efficiency of Hemel Hempstead as master distributor for the country (CW, June 28), held its inaugural meeting last week.

The group's representative to Cupertino will be Alan Woods, managing director of Digitus. "We all think Apple is a tremendous product and we all want to continue dealing, but we want to know we have sources of supply," he said.

Of the position of Apple's first

UK distributor, Personal Computers, Woods said that he did not believe Apple would dump it as a distributor. "If it does, then we want to know who is going to be dumped next."

Data Efficiency circulated all existing and potential Apple dealers last week with a statement of the new distributor position in the UK.

Computer education

exhibition

COMPUTER Education will be the theme of a one-day talk and conference being held on July 8 by Rudnor College, Farnham, Surrey, as part of the Microprocessors Application project.

Scottish centre

A CENTRE to develop microprocessor applications and encourage industry to use them is being considered for Central Scotland by the Scottish Office.

Alex Fletcher, Minister for Industry and Education at the Scottish Office, said in Glasgow this week that he hoped the centre would be set up well within the next two years, possibly based on an existing establishment.

Back to work

UNIVAC technicians at the Twin Cities plant in Minnesota returned to work on Monday after approving a pay offer. The 2,700 electronic technicians went on strike in May (CW, May 31). The plant is the sole source of Univac 1100 Series CPUs, including the new low-cost 1100/60.

Hambros choice

ICL user, Hambros Bank, has decided to go to Univac rather than ICL for the machine to take over an online transaction processing and information retrieval workload from two ICL 1903Ts. Hambros has ordered the first Univac 1100/60 in the UK and the bank says that Univac offered better price/performance and was the only supplier to put forward a complete package with detailed and practical transition proposals.

CA under investigation

IT never rains but it pours. After announcing that it expected to announce a loss for its financial year which closed last week (CW, June 28), Computer Automation is being investigated by the US Securities and Exchange Commission and is being sued by a shareholder.

The SEC is investigating allegations that officers of the company made misleading statements while trading in the company's shares, and the shareholder is suing the company and its officers for allegedly making false statements about its financial condition.

First 4331 delivered in UK

WHAT is believed to have been the first IBM 4331 to be delivered in the UK was installed last week by SDI at its Wymondley offices. It was supplied to SDI by International Brokerage and Leasing, Ascot.

Two other software products in direct competition with IBM have also been in being awarded machines: the first batch.

These are MSP, which is taking delivery of a 4331 in the middle of this month, and Altraco, which has been offered its machine for August.

Suggestions that these will be respectively the third and sixth 4331s to be delivered in the UK were refuted by a spokesman, who said that machines had already been delivered, in addition to the one mentioned.

He could assign no great significance to the fact that, for software-probable companies, the first 4331s to be delivered in the UK were ordered from randomisation.

Papers for DPP

PAPERS from the investigation by Nottinghamshire police into an alleged breach of security at the Police National Computer have been sent to the Director of Public Prosecutions, who is considering whether to bring charges. A police sergeant was suspended last December when he was accused of supplying the names and addresses of car owners to staff working for Ladpo casinos (CW, January 14).

3-year wait for 4300s

US CUSTOMERS have now been notified by IBM of delivery dates for their 4300 machines, and some will have to wait almost three years.

Following announcement of the delivery dates, leasing companies are up in arms, because they believe IBM has discriminated against them. Typical is Grayhound Computer Corp, which told the Wall Street Journal that it ordered 380 machines, and was given delivery dates on only four of them.

IBM has denied discriminating against leasing companies in the drive, but is known to dislike the way companies have in the past sold early delivery dates at a premium.

Third party

ATLANTIC Computer Leasing is moving into the third party IBM maintenance business through its subsidiary, Atlantic Computer Engineering, which was formed last year to handle equipment installation and the fitting of special features.

NEVER FINISHED

NINETY-nine per cent completion is the most that can be hoped for when programs are being written, according to one researcher they never are completed, since they are a model of the real world. His argument appears in Programmer Notes.

Meditation en masse

YOU will have heard of Cottage Industry Computing, but how about Stately Home Industry Computing?

The other day I went out to Mentmore Towers in Buckinghamshire, the magnificent Victorian pile built by the Rothschilds and recently bought by the Maharishi Mahesh Yogi and his crowd, transcendental meditation for the purpose of.

The house is now inhabited

by 80 fresh-faced young men (no robes or sandals — dinner jackets were the order of the evening) who constitute the World Government of the Age of Enlightenment, or Great Britain. Our host was the Minister of All Possibilities — Research and Development, who explained that meditation brings the mind to the vacuum state of quantum physics, which contains all possibilities and where we can tap the infinite organising power of nature.

This development of the technology of pure consciousness leads to mastery of the laws of nature, enlivens the field of infinite correlation, and reduces collective negativity. (I hope you are following all this.)

It turns out that if you get enough meditators all together in one place — a sort of critical mass of meditators — peace descends on the community and all terrorists, guerillas, and oppressors lay down their arms. Harmony, creativity, and happiness reign. Hence the Age of Enlightenment.

To achieve this admirable aim, everyone is busily learning to meditate, but sadly in the meantime money is required to make ends meet. So it has been decided to go into business writing computer programs. To this end a Pet home computer has been bought, and there indeed it was, sitting in the corner of the Grand Hall, freshly unpacked.

"We have learnt Basic," one of the meditators told me, "and a friend is coming out to teach us APL."

What exotic programs are they going to write, I asked. "Oh, small business systems — stock control, payroll, that sort of thing."

Your new applications programming team.

For disbelievers

MY colleague Martin Banks, recently returned from the IMM show in Geneva, tells me there was consternation among visitors who were hoping to catch a glimpse of the wares of one of the firms listed in the catalogue, Patrick Computer Systems of Winnipeg, Canada. They went round to the stand, number 632 in the Palais des Expositions, only to find it completely bare.

Martin assumed that the firm had just not turned up. I pointed out to him, though, that Patrick Computer Systems' star product is a small business machine called Leprechaun.

Now, everybody knows that just because you can't see a Leprechaun, doesn't mean it isn't there. I can assure disappointed visitors that Patrick and his pals were eagerly waiting for your custom, and if only you had put your trust in them and their little green machine you could be arriving at your office in the morning to find all your sales ledgers and invoices neatly done for you. Shame on you for not believing.

Hardware—Disney-style

I USED to think that we computer people had our bizarre terminology largely to ourselves, so I was a little miffed to discover that in the US amusements park business — Disneyland, Magic Mountain, Knott's Berry Farm and so forth — hardware is things like roller coasters.

They have their own software too. Turns out that software is variable entertainment — drum majorettes, black-face minstrel shows, whey-faced folk groups etc.

"I told you that the police national computer was the thin end of the wedge."

Disc drive challenge for IBM H-series

AN alternative to the high capacity disc drive, code-named "Whitney", that IBM is expected to introduce with the projected H-series of large scale systems, is being developed by Storage Technology, according to the company's chairman, Jesse Awelwa. Storage is also bringing out a disc subsystem for 4300 machines.

According to Awelwa "Whitney" will have a capacity of 1.2 Megabytes per drive, nearly four times the capacity of the 3380 drive.

Awelwa said that the high capacity of the "Whitney" drive would be achieved by a dramatic increase in linear recording density to at least 12,000 bpi, twice the existing maximum.

But the number of tracks per inch was expected to be only 760, actually less than the track density on Storage's 8850 drive which records at 857 tpi. The 8850 stores 635 Megabytes on each spindle.

Apart from the high recording density of "Whitney", another significant technical feature was expected to be two read/write head actuators per pack.

Looking a bit further into the future, Awelwa said that capacities of 3,000 Megabytes per spindle would be available within five years.

Much nearer in the future Storage will be launching an alternative to the 3380 disc subsystem that IBM introduced with the 4300 machines early this year (CW, February 8). The

AWELWA... high capacity achieved by a dramatic increase in linear recording density.

3380 supports the 3370 drive which stores 570 Megabytes per spindle.

Awelwa pointed out that Storage's 3380 compatible system would essentially be a by-product of the company's development of a "Whitney" alternative.

The club meeting was also given a demonstration of Rockwell's 6802-based microcomputer with keyboard and 20 character LED display and 20 column printer on board. The £250 micro has five 2K ROM sockets, two of which contain the monitor with keyboard and printer routines and three are available for options such as the £60 two pass assembler.

Because the printer is driven from ROM, it can be programmed to print Arabic characters or graphics. Interfacing is via 10 line VIA, versatile interface adaptor chip, which also does serial line at speeds selectable from 110 to 9,600 bps.

A £20 homebuilt RCA Cosmic Elf followed, shown by E. Cunningham who has started Cosmic Usara Club, which has 13 members so far. Based on the RCA 1802 processor chip, the machine uses LEDs for switches for output and input as well as a hexadecimal keyboard and TV display.

The NLHCC is planning to buy several of each machine in its next season.

Finally a Leany remote control car was shown, which has 1000 4 bit processors to implement the nine commands that can be transmitted from a keypad to the car by radio. The car costs £23 — and there are 141 shopping days until Christmas.

Plans were announced for the next season starting at the end of September, when the club will become a class, with courses for business users and professionals as well as software workers using the Polytechnic of London's DEC system. The club's other machines are the Polytechnic's microcomputer and other machines.

An early pattern of bussing children to computer centres has changed in favour of bussing microcomputers between schools, and a feature of several schools is last season's students becoming this season's tutors and consultants.

He also told the 100 club members present that a further committee had been set up to consider future bus structures, to cater for 32 bit and larger processors, directly accessing more than the 16Mbytes addressed on the current specification, and catering for multiprocessing with more than 16 devices. This would probably involve multiplexing signals on the bus.

A film was also shown at the meeting which was made by IBM to show its UK sales staff what personal computing is all about. It had been given to the club because it featured on interview with Robin Bradbeer, one of the club's founders.

The main theme of the film is the California scene, showing computer education in high schools, with four machines to a class. In one school while another school has one machine between two students.

An early pattern of bussing children to computer centres has changed in favour of bussing microcomputers between schools, and a feature of several schools is last season's students becoming this season's tutors and consultants.

lupment of a "Whitney" alternative, but he saw a growing market for Storage Technology's so called medium-scale IBM system users now that the power of such systems was so much greater. Traditionally Storage has tended to concentrate on users of big systems.

A relative late comer to the plug compatible disc drive market, Storage Technology claims to now have about 70% of the total business worldwide for drives that are software compatible with the IBM 3380. The company now has marketing subsidiaries in most parts of Western Europe.

The 3380 can now be attached to IBM 370 and 308X machines but it will only support the older 3340 and 3344 drives on those systems, not the 3370. So the 317.5 Megabyte per spindle 3350 is still the biggest IBM built drive that can be used with IBM's large scale systems. On 4300 systems the 3380 will support the 3340, 3344 and 3370.

Storage Technology is developing its own IBM compatible 32-bit processor for V8S which will use magnetic tape type addressing to access data from banks of high capacity Storage Technology disc drives.

V8S will also feature a high speed cache memory and charge coupled devices. Storage pioneered the use of CCDs in its 4305 solid state disc, a faster and cheaper alternative to the IBM 2305 fixed head disc drive (CW, November 2, 1978).

NCC's commercial business up 35%

AN increase of 35% in business with the general computing community, as opposed to the government, is one of the more significant aspects of the first annual report from the National Computing Centre since it changed its constitution last year. The report covers the 1978/79 year which ended on March 31.

Memorex complaint to EEC 'unfounded'

—SAYS IBM

"UNFOUNDED and without merit" is the way IBM has described the anti-monopoly complaint being made to the EEC Commission by Memorex.

The plug-compatible peripheral supplier wants the EEC to outlaw IBM's practice of not releasing interface data for new peripheral products until the first deliveries of the kit take place.

The same interface issue loomed large in the Memorex anti-trust case against IBM last year in the US and the case ended in the judge giving a directed verdict in favour of IBM. Memorex is now appealing against this verdict.

In Europe, Memorex is claiming that the IBM practice infringes the anti-monopoly articles in the Treaty of Rome.

A statement issued by IBM on the Memorex complaint to the EEC Commission says, "As we have not been informed by the Commission of the details of the complaint, we cannot comment on specific allegations. However, based on Press reports of the issue seemingly in question we can say that it appears to be the same issue raised by Memorex in its unsuccessful litigation in the US."

"We, therefore, consider the allegations as reported unfounded and without merit."

IBM scored a further success in the US late last month when another anti-trust opponent, Calcomp, lost its appeal against a directed verdict, brought in two years ago that there was no case for IBM to answer (CW, February 17, 1977).

In another issue involving the EEC Commission, IBM is insisting that it would be violating Articles 75 and 76 of the Treaty of Rome if it revealed its prices to third party lessors of IBM equipment. These articles are concerned with anti-competitive collusion between companies, in particular with price fixing.

However, the European Computer Leasing and Trading Association, ECLAT, believes that IBM would not be violating the Treaty if it made its price lists available; and ECLAT is currently trying to obtain official confirmation from the EEC that this view is correct.

Computer Weekly at the beginning of the year (CW, January 4).

The company is working on a back-end database with a DMS-1100 interface, which combines the best features of Codasyl, network and relational databases, with the common features microcoded.

It appears that the back-end system will have two levels of processor: the database processor itself, and additional intelligence within the memory to improve further the speed and efficiency of access to data.

Univac's plans for a back-end processor combining features of network and relational databases were first revealed in...

Univac's plans for a back-end processor combining features of network and relational databases were first revealed in...

The NCC's income in the form of development contracts from the government's Computers, Systems and Electronics Requirements Board was just over £1 million in 1978/79, almost the same as in 1977/78, but as a proportion of total income it fell from 37% to 30%.

In contrast to this lack of growth, income from other areas jumped from £1.5 million to £2 million. Income from training services increased from £800,000 to £770,000, while sales of software products leapt from just over £400,000 to nearly £700,000.

The operating surplus charged up before corporation tax in 1978/79 came to £259,000 compared with £216,000 the year before, although the surplus after tax was less — £82,000 compared with £118,000 in 1977/78. The Inland Revenue adjusted the tax upwards to £177,153 in 1978/79 because the £100,000 paid in 1977/78 was a

lot less than the 52% of operating surplus that should have been paid.

The NCC's change from a grant-aided organisation to independence was completed last year. Its governing body changed from a council to an industrial type board of directors.

YEAR-END figures from the two British electronic giants show pre-tax profits up over 18% at GEC, but only 7.9% at Plessey. Both companies close their books on March 31, and GEC recorded pre-tax profits of £376.4 million on turnover up 8.7% to £2,500 million. The Electronics, Automation and Telecommunications group was a star performer, with profits up over 32% at £101.2 million on turnover up 28% at £862 million. This division is more than twice as big as the next largest, and the figures include sales to other GEC companies.

Plessey's 7.9% profit improvement at £48.2 million was made on a growth in turnover of 8.1% to £846.3 million, and would have been £2 million higher but for the rise in the value of sterling against the currencies of most of the overseas countries where Plessey trades.

Profit figures were also hit by two troublesome operations: the Garrard record changer business lost £2.8 million, and the Strouger Exchange factory at Edge Hill, Liverpool, lost £8 million.

As a result, the £7.5 million profit made on the £33.5 million sale of Plessey's 24.42% stake in ICL was more than wiped out.

Growth in Plessey's computer-related activities, categorised as office, data and control systems, was dramatic: profits rose 16% to £9.08 million, 20.3% of the total, on turnover up a formidable 56% at £104.9 million, where they represent 18.2% of Plessey's turnover.

Electronic Systems and Equipment, also increasingly involving computer-based products, was the biggest single profit contributor, providing 35.8% of the total at £15.8 million on a turnover of £173.2 million.

opting to lease rather than buy their machines, and leases do not start to generate profits until well into the leasing term.

However leased machines are a valuable asset to Amdahl, and if the company began to run short of cash, it could raise money by selling an interest in its lease base. So far it has not done so, because the prevailing high interest rates in the US would make it unattractive. It could well change its mind if, as expected, interest rates begin to fall later in the year.

The setback was fully anticipated by the company. Asked about the cash reserves Amdahl was building 18 months ago, Dr Gene Amdahl told Computer Weekly, "We are offering leases, and not many have been taken yet, but if that changed, the cash position would alter very quickly."

Itel's problems in the plug-compatible market are much more severe than Amdahl's, since Itel has been hit by a decline in demand for its AS machines, whereas there has so far been no slackening in demand for Amdahl's 470V line.

MICHIE'S PRIVATEVIEW

Robots, hermits and harlots

OUR new Ambassador to Washington, Sir Nicholas Henderson, has lamented the continuing industrial decline of Britain. Other voices warn of our role as Europe's new peasant, and have commented on lack of national fire and will.

BBC Horizon's recent "The Robots are Coming" jolted us anew with statistics of programmable robots pouring into Japanese and American manufacturing industry, and to a lesser extent into the factories of our European competitors. Some 4,000 Japanese robots are already at work, largely in the car industry. In British Leyland, only a handful have been purchased and these are for technical assessment only. None are doing actual jobs.

The screen showed Engelberger, the buoyant founder of the world's largest producer of robots, Unimation Corp. He smiled in rueful sympathy at our parlous state.

Why are industrial robots not being introduced here? His answer was one-sided but con-

vincing. He blamed managerial timidity. As for the trade unions, he had seen little signs of significant opposition from that quarter. Further, British management was so scared to mention such topics to the work-force that they were not in a position to know what the shop-floor attitude might be.

To complete this picture, mention should also be made of government policy, or non-policy, which allows Britain's annual rate of investment in re-equipping industry to drift at about half that of the rest of the advanced nations. Surely the know-nothing management tradition, impervious alike to governmental and trade union scolding, might yield to a suf-

ficiently steep scale of exemptions and premiums built into company tax legislation?

Engelberger also made the point, based on US experience, that to be displaced by a robot from a boring and dirty job is not so bad if the worker ends up supervising a robot team.

Of course there has to be a net reduction of working hours. But how welcome, said an ASTMS spokesman on the same programme, if that could be managed in such a way that we spend less time doing what we have to do and more time doing what we want to do?

Some years ago a former Lord Provost was so moved by this thought that in his retirement speech he mis-spoke himself to

immortal effect.

"I'll be away now to the far highlands," he informed the solemnly assembled company "where I plan to live the life of a hermit!"

Historians of the occasion now believe that the intended word was "hermit." Yet as Freud was the first to emphasise, these slips can reveal hidden attitudes. Doubtless in a Scottish Lord Provost's secret mind, doing quietly what one wants to do is not filed, as it would be in the mind of a Catholic or a Buddhist, under "RETREAT, SAINTLY" but rather under "IDLENESS" — with all the degeneracies and degeneracies into which that devilish state may plunge even the best Presbyterian!

Truly, there are many breeds of men. But many more are the mythologies which they cherish about each other. The following is from a book to be found in school-rooms: "They are lazy individuals, apparently devoid of morals, and always prepared to lie, cheat and steal."

Whose conversation are we overhearing? Perhaps it is a data processing manager letting his hair down about maintenance staff. Or is it a board member at Dagenham grousing about the work-force? Yet it could just as plausibly be one of the shop stewards on the subject of the

board! Maybe it was overheard in the Athenaeum, and the target was the new Ministers of the Crown? And yet it sounds not unlike the late Richard Crossman writing about senior civil servants. Or in the graves of Academe: "Tell me, young person, what are the Professors like round here?" Or "You were saying, Denn, about the students..."

Let me reveal that the statement is from a New South Wales textbook. It refers to the Australian Aborigines. Textbooks are purportedly sources of knowledge. This circumstance starts in my mind a train of uneasy thought.

A more dynamic knowledge source than any textbook is arising in the form of computer-based "expert systems," of which SRI International's PROSPECTOR is an impressive example. One of PROSPECTOR's areas of expertise is the geology of uranium. As it happens, political tension exists around the discovery of uranium deposits lying beneath the Aborigine's traditional habitats.

PROSPECTOR's knowledge, of course, does not at present extend to non-geological factors which might affect decisions to drill. But for Son of PROSPECTOR or Grandson of PROSPECTOR the picture will be less clear. It is not beyond possibility that such a system might incorporate relevant legal information concerning Aborigines and land rights. Beyond that, the proprietors of automated systems may wish to add to the knowledge-base more than dry technical and legal facts, and to include some baser generalisations about relevant human groups. Questions of social accountability of stored "knowledge" will certainly then arise.

Equally certainly, impartial study of human history and politics should that will not fully prepare the mind of A. Boggs, twenty-first century supervisor of robots. Learning forward respectively, he types SUPER-R.O.B., the aptest and most perceptive member of his team: "What's the guy, apparently devoid of morals, and always prepared to lie, cheat and steal?" Super-Rob's reply? "...You've guessed it: 'Homo sapiens'."

PROGRAMMER NOTES

The First Law of Computing is that a program is never finished

THE claim that a program is 99% complete is only rarely an outright lie, but equally it hardly ever means that a job which has already taken 99 days will be finished in another one.

Instead, what it often means is that a way can be seen to finishing the software which does not entail major redesign.

Such optimism may or may not be well-founded, but should in either case be treated with some caution; it may well signal that the programmer regards his involvement as ended and is itching to get on to a new assignment.

In practice, of course, what often happens is that pressure of other work means that the programmer's wishes in this respect are met. The program he was previously working on, still "99% complete," then slides gracefully from development status into a maintenance phase.

How often is it, then, that a program is actually completed?

Given the preceding discussion, it will perhaps come as no surprise that the answer made

by one leading researcher is "never." However, the reasons he gives are fundamental rather than anecdotal.

The fact that a program can never be finished is the "First Law of Computing," according to Professor Manny Lehman, of Imperial College, London, and stems from the fact that a program is always a model of the real world.

"This is intrinsic to a program," he noted, "and it means that software can never be perfect. You can never keep up in your software with the changes that are occurring in the real world."

"Besides, the very introduction of a computer system changes the world that its component programs are supposed to be modelling. So it's inevitable that it will be immediately out of date."

"In the context of banking, for example, customers are restricted to conducting transactions between 9.30 and 3.30. However, if you introduce automated equipment, the

pattern of bank use will undoubtedly change, possibly in ways very hard to predict.

A system designed to handle current workload patterns could, for instance, turn out to be both over-equipped and unsuitable when customers adapt to the new freedoms.

"Another way of putting it is that the statement of requirements for a system will probably be out of date as soon as it is implemented — if not before. Yet requirements documents are hardly ever updated once a system has gone live."

One lesson that Lehman draws from all this is that changeability is one of the most important properties of a program.

"Structure has no value in itself," he says, "except in so far as it improves changeability. Unfortunately, while it is a good thing to invest in changeability, it is still a research topic."

Three more opt for Asas

THREE further North American customers have been found for Asas, the finite element analysis package developed by Atkins R&D, a Canadian Department of Defense site. The software, for use on Xerox and DECsystem 20 equipment, was the third customer, following the University of New Orleans and DECsystem 20.

Puzzler

ON the occasion of his daughter's marriage, a sporting squire gives the happy couple a plot of land, to be selected by them from his vast estates. To test their business acumen, he specifies that the plot be bordered by four straight sides with respective lengths of 1, 3, 8 and 6 furlongs and that they them-

selves should decide exactly what shape it is to be.

How should the newly-weds plan their boundaries, in order to maximise the area of the plot? What shape is best, and how many square furlongs will then be enclosed? Does the order of the sides matter? See page 45 for solution.

SOFTWARE FILE

Pre-release specs wanted from IBM

STILL snarling over the lack of pre-release information on DOS/VSE, which has until now prevented them from updating system software packages for use with the new operating system, software houses are optimistic that the problem will be alleviated in future via an extension to the Software Information Exchange Program launched late last year (Software File, January 11).

The proposals, to which IBM is understood to have agreed in principle and which are supported by Adapso in the US and by the CSA in the UK, call for IBM to provide more advance information on future software products.

What is envisaged is that software houses should be able

to obtain full documentation on programs that have gone to alpha or beta sites, gaining a lead of perhaps one to three months before the software is fully released.

Participating companies would be required to pay the standard monthly licence fee for the program product, receiving everything apart from the program itself.

Companies could subsequently return the documentation, having paid licence fees only for the months for which they held it.

Currently, the Information Exchange programme only gives to software houses information that is already freely available to IBM users.

In the case of DOS/VSE, this has meant that companies are only now receiving the detailed specifications they need to implement native mode versions of their products on the 4300.

Thus in many cases where 4300 implementations have been promised, it will still be some months before they become available.

The delays, which mean that early DOS/VSE sites are at the moment unable to use proprietary products interfaced intimately to DOS/VSE, are naturally aggravating to both suppliers and users.

Combined with the lack of full functional specifications for many DOS/VSE components, they have led to a general uncertainty in the market, with potential purchasers reported by some to be holding back.

Hours to market Sort-1 enhancement

AN enhanced version of the OMSI Sort-1 package for DEC POP-11 users running under RSTS/E is being marketed by Houdre Computing. Called OMSI Sort-1-Plus, the software runs in 18K words and is priced at £475.

Features of the package include the ability to sort up to 15 million records, each up to 512 bytes long, with as many as 15 specified sort keys. Key fields may be alphanumeric, integer, decimal, or single or double precision floating point.

Seen as a complete replacement for DEC's V08-01A package, the new version also permits spanned records.

Infonet addition

A FINANCIAL modelling system called Sofi (Simulation of Financial Institutions) has been made available by CSC on its Infonet service. Sold to be designed specifically for financial experts, the package is interactive and includes its own database and 3-D graphics facilities.

Johnson to sell OS prod control system

A HIGHLY regarded production control system for IBM OS installations is to be marketed in this country by the newly-formed UK subsidiary of Johnson Systems (Software File, July 5).

The system, Apex, is already marketed by Johnson in the US and West Germany and will be available here by Christmas.

Johnson obtained US marketing rights to Apex last year from the West German software house which developed the system, Sven, of Hamburg. At around the same time, European rights to the software — then known as Pecs — were acquired by CAP-PP (Software File, December 14, 1978).

Johnson has since purchased the system outright and is thought to be waiting only for the CAP-PP licence to expire before marketing the software here.

Production control packages are designed to improve the efficiency of traditional opera-

tions departments by automating such aspects as the submission of JCL and the initiation of dependent processing steps.

The best-known products in this area are probably the Value systems marketed in this country by RTZ Computer Services. A Johnson spokesman noted, however, that these were typically more ambitious than Apex, in that they aimed to load a machine according to a timed job schedule.

Last week's story on Johnson's other main products, Jars (Software File, July 5) erroneously reported that Computer Associates had acquired Datachron, the developer of the principal competitor to Jars, Jasper. CA has acquired only Jasper, and is currently handling marketing and first-line technical support. Responsibility for second-line technical support and enhancement will be transferred to CA at the end of a hand-over period.

HP makes available its implementation language

ECHOING DEC's release to end-users of its VAX-11/780 system implementation language, BLISS-32, Hewlett-Packard has made available its equivalent facility on the HP300, called SL/300.

Like BLISS, SL/300 is a high level, block structured language intended to give much the same efficiency and control as assembler. It is the language in which all the HP300 operating system is written, including compilers and file and database management subsystems.

In support of its use for writing system software, it includes such features as dynamic array allocation; recursive and re-entrant procedures; bit-level manipulation; and task synchronisation.

It also supports a full range of

data types; an extensive file system; and unlimited statement nesting.

HP anticipates that SL/300 will be used chiefly by programming specialists for tailoring application systems and by third-party program suppliers, such as OEMs.

Such indications that the MMS general ledger and financial reporting system was being adapted for use on minicomputers (Software File, April 20, 1978) have been followed by the release of a version for the HP3000. Written in Cobol, rather than in the HP3000 implementation language SL/3000, the software is marketed in this country by Package Programs and joins existing versions for the IBM System 3, ICL 2903, and IBM and ICL mainframes.

Recovery aid a feature of Cullinane's IDMS-DC

CONCURRENTLY with the release in the US of its teleprocessing monitor package IDMS-DC, Cullinane has announced record profits for the financial year ending on April 30, showing a growth of 56% over 1978.

Total revenues reached \$13.9 million with profits of \$1.6 million. The equivalent figures for 1978 were \$8.9 million and \$1.0 million respectively.

IDMS-DC, the nucleus of which became available last year (Software File, November 2, 1978), is fully integrated with IDMS itself, according to the company.

By bringing the two architectures together, it notes, such benefits accrue as more economical use of memory, greater simplicity of use, and faster response time.

It also helps in the area of recovery, where the use of

separate DBMS and TP facilities can give rise to problems of incomplete recovery following a crash. In an integrated architecture, all work can be recovered in step.

The US licence fee for IDMS-DC has been set at \$50,000 with a 10% annual maintenance charge.

A rumour that Cullinane might be about to enter the UK market directly, displacing its long-term agent Solcon, has been firmly denied by the company.

A Cullinane spokesman said that the company had no such plans and registered "amazement and surprise" at the suggestion.

Cullinane trades through agents in most of Europe, including West Germany, but is directly represented in the Benelux countries through a subsidiary in Belgium.

Euro marketing review

THE European market for software packages and packaged computer services has been analysed in a 272 page study now available from Frost and Sullivan. The report covers the years 1977 to 1988, and is priced at \$850.

Frost and Sullivan expects the total market to reach \$16 billion a year by 1988, and to total

cumulatively \$86 billion over the period. Surprisingly perhaps, software packages themselves are predicted to account for less than six per cent of this business.

Professional services and bureau processing will take the largest share, accounting between them for 84%, with the rest being spent on timesharing.

NEWBURY

SMART MICRO-BASED VISUAL DISPLAY TERMINALS

- Model 7007-7008**
- British design and manufacturer
 - Based on 8080A Microprocessor
 - Two-page Memory 3,840 characters
 - 24 Displayed line of 80 characters per line
 - Switchable Transmission Speeds from 60 Baud to 19,200 Baud
 - Split Speed Transmission Mode
 - Dual Interface - CCITT V24 and 20/60 mA Current Loop
 - Hard Copy Printer Output
 - Prioritised Field Format - Blink Background or Half Brightness
 - XY Cursor Address (send and receive)
 - Half or Page Mode
 - Video Output for External Monitors
 - Full Character Editing Features
 - Block Transmission from Screen by Line or Page
 - Green Phosphor Non-glare screen

- Model 7001-7002**
- 24 Lines of 80 characters per line
 - Selectable Baud Rates from 50 to 19,200 Baud
 - Dual Interface - CCITT V24 and 20/60 mA Current Loop
 - Teletype Compatibility
 - Hard Copy Printer Output
 - Selectable Half or Full Duplex
 - Video Output for External Monitors
 - Green Phosphor Non-glare screen

- Model 7000**
- Teletype Compatible
 - 24 Lines of 80 Characters per line

OP SPOT

'Contract staff should not try to run the computer room'

IF the operations department is to provide the best possible service, it must take into account user requirements - which vary considerably from one company to the next.

As a result, sites which are similar in terms of hardware and software often differ considerably as regards their applications procedures.

This is why the suggestions of contract staff are seldom taken up, according to Barry Johnson, operations manager at Ulvac's West London benchmark centre.

Responding to comments made by contract staff at a meeting on contract work, held by operations staff agency Co-Operators (Op Spot, June 21), Johnson said: "Contract staff can't expect to walk into an installation and tell the operators how to run the system - it's just not on."

"Procedures vary so much from one site to the next. So the shift leader often can't apply what the contractor puts forward, even if he wants to."

According to Johnson, contractors should use the work as a means of broadening their experience of the industry, and then look to enter operations management.

"Rather than trying to tell shift leaders how to run the

Barry Johnson

work, the contractor should save his expertise until he becomes a manager - if management is what he wants, that is."

But, he pointed out, not all contractors are interested in career progression: "As one of

the contractors at the meeting said - 'I'm only in it for the money'. It's a fact of life."

Johnson worked with contractors during his days as an operator at Shell Mex in Wythenshawe, Manchester.

"I always got on quite well with them and have no qualms about their ability. In fact, in some cases they are better than permanent staff."

But, speaking as an operations manager, Johnson pointed out that contractors don't always have the right attitude towards the work:

"There must be a question mark over their drive and approach - you can't expect them to take the same interest as permanent staff," he said.

His installation does not employ contract staff because of "the confidential nature" of the work carried out there, he added.

Make sure resources aren't wasted under IBM OS, with Modify

THE IBM OS Modify command is used by the operator to alter the function of system reader, writer and initiator procedures.

It is useful in that it sometimes saves the operator from having to stop and start procedures. The format of Modify varies in accordance with each procedure.

To ensure that system resources are not wasted, the console operator should keep a close watch on the input queues and the classes served by each of the system initiators.

If one of the input queues is particularly long, the operator should use the Modify command to alter the order in which the queues are served by one or two initiators. For example, should input queue "P" be the one concerned, he might enter the following commands:

F INIT, CLASS=PXY
F INIT, CLASS=PXAY

After these commands have been processed by the system, input queue "P" will be given top priority by both INIT1 and INIT2.

Similarly, should input queue "T", for example, be full, the operator can modify a writer to

deal with it. To that end, he might enter:

F OOE, CLASS=TKYZ

After this command has been carried out by the system, printer OOE will serve output classes T, X, Y and Z, in that order.

In relation to readers, Modify may be used to command the card reader to place jobs on the system hold queue. The command format is as follows:

F RDRI, TYPRUN=HOLD

This can be useful to operator and programmer alike at sites where an open shop form of job testing is employed (Op Spot, April 12). At such installations the programmers have access to a card reader, enabling them to feed their own work to the system.

Problems sometimes arise as the end of testing time approaches because the programmers are always keen "to get one more shot in", and the operators are, at least, equally keen to get them off the system.

A compromise is reached by modifying the reader as shown above. This enables the programmers to put their work on the hold queue for processing later in the day.

Don't blame the op for wavy-line printing

"IF the ICL 1933 printer produces wavy-line output it's the fault of the unit, so don't put the blame on the operator."

Thus Ron Linton, computer operations controller at Manchester Polytechnic, replies to comments from Gerry Mills, managing director of computer bureau Mills Associates (Op Spot, June 7).

Says Linton, "We have both an ICL 1933 and a 1932, and, as far as I can remember, we have always had trouble getting good print quality from them."

The wavy-line print listings sometimes produced by the units is due to the manner in which they work, he says.

"They are electro-mechanical barrel printers which print all the As in a line, then all the Bs

and then all the Cs, and so on. You find that the paper has moved slightly between each character, resulting in wavy-line print."

Seminars on future developments

OPERATIONS specialists Infotech Operations, are to run a series of seminars on the next five years' technology developments and their effect on the role of the operations department.

Called the International Management Forum, it is aimed at the operations manager, and meetings are to be held in London on October 17-18, November 14-15 and December 17-18.

By Bernard Allen

HINT OF THE WEEK

For those who can't hear the telephone

WHEN the card readers are going full out and two or three printers are clattering away, the computer room is a very noisy environment. This causes problems for the operators when they are dealing with telephone calls from job control and users.

To ease matters, use telephones which have a facility for adjusting volume, suggests Mike Lane, a shift leader at Queen Elizabeth Hospital in Edgbaston, Birmingham. His advice, "If noise is a problem at your site, get the Post Office to install telephones which are normally supplied to the hard of hearing."

"Fitted to the earphone is a knob which enables you to adjust the sound level. This often makes it easier to understand what the person on the other end of the line is saying."

By the way, the Post Office charges £5 for installing these telephones, and the rental charge is 40p above the standard quarterly rate.

'No longer living in the era of the Tolpuddle Martyrs'

"IF more people were convinced that we are no longer in the era of the Tolpuddle Martyrs, these full-time union officials could only add to the swelling unemployment figures."

With these words, R. Jacobs, operations manager at British Enkalon in Leicester, comes to the defence of John O'Reilly, chief operator at Astral Computer Services, London.

O'Reilly was criticised by union officials (Op Spot, June 14) for saying that there is no need for operators to become involved with unions, and that anyone dissatisfied with his site has only to seek another position in the industry (Op Spot, May 24).

Comments Jacobs, "To hear the words of H. Moore of APEX, I am quite sure that John O'Reilly is 'worth his buttons'. If that were not the case, he would not be a chief operator now."

According to Jacobs, operators should bear in mind that chief operators, managers and the like have experience of working shifts in the computer room environment.

"It must be remembered that the equipment we used was, in most cases, similar to that in use today. Even with the advent of new technology, the underlying principles of operation have not changed dramatically."

Looking back in his time as an operator, Jacobs recalls that staff were genuinely interested in the work:

"In my days as an operator, we were not particularly interested in what we could squeeze from an already overstretched OP budget," he comments.

He remembers how he and his colleagues were prepared to perform tasks above and beyond the call of duty for the good of the department:

"We came into computing knowing full well that we were required to work shifts and that the hours that God sent us."

"How many operators I wonder, can remember times they chose to work through their meal break or left several hours late in order to help the next shift? I certainly can't."

"Very rarely was payment asked for on such occasions. Overtime pay was only expected when management actually requested extra time to be put in by the operators."

He mentions that when he was an operator, the majority of staff realised that the computer room "beats hell out of 95% of other forms of employment."

In his view, the majority of present-day operators have an attitude similar to that of the predecessors.

But in those who haven't, he says: "I would suggest that the few who suffer from the five-day syndrome should carefully re-examine their choice of career."

LETTERS TO THE EDITOR

'France and UK becoming the laughing stock of videotex world'

YOUR story "French pull the plug on Prestel" (CW, June 28), illustrates all too well the dangers of a narrow and parochial attitude towards videotex/teletext developments.

There is no question that the future markets for videotex products and services are huge. The world's first private enterprise videotex services are about to be launched in Holland and the US, while the public service in the UK is now in being.

Trials are also being conducted in most European countries, in Canada, Hong Kong and Japan. In terms of hardware, software and expertise valuable markets are opening up. My own

company has sold its videotex research services in over a dozen countries.

The UK has a lot to offer. Prestel is still the most advanced system, in terms of the volume of information available and the range of applications covered. The lessons learned during the build-up to a public service in Britain are utterly invaluable.

The French system also has a lot to offer, particularly for an accented and subtitled language. It has much greater flexibility than Prestel, at the cost of lower efficiency.

How are Britain and France responding to the big opportunity that these videotex mar-

kets offer? By pooling their research findings? By devising a joint standard, and selling it to the rest of the world? By mounting joint Anglo-French sales missions to sell the concept of videotex first and specific products later?

No: they respond by, at best, ignoring and, at worst, denigrating each other's product.

Thus they damage the concept of videotex and reduce the market potential as a whole. Both countries are to blame and examples could be quoted against both.

There is a task here that requires ministerial action. Let Sir Keith Joseph and Mr. Norbert

Sagard issue a top-level non-aggression directive. Let Britain and France get down to serious joint work to develop the global market, rather than indulge in mutual recrimination and abuse.

The present situation brings relief only to the Americans and Japanese, who will benefit if the European suppliers falter - and who, I can assure you, find these Anglo-French squabbles vastly amusing.

France and Britain are well on the way to making themselves the laughing stock of the videotex world. Decisive action is needed to stop this stupidity.

Putting law study record straight

I MUST take exception to your front page headline (CW, June 21) "Grandiose law project panned", which bears no relationship to the EEC Commission's technical study in legal information retrieval as discussed at the symposium in Strasbourg, nor even to the article associated with it. Had the thought that sensation seeking headlines were the prerogative of the popular press and had no place in a technical journal which had a duty to provide balanced, fair reporting.

To put the record straight, the Commission's study was a European-wide investigation aimed at identifying the common problems faced by all the countries in the dissemination of

the law, and at suggesting solutions to these problems based on the use of modern computing techniques.

This formidable undertaking was entrusted to an international consortium (German, French and British) whose project team, ably led by John Killoury of Scotland, carried out the task in a highly professional manner.

The work done, embodied in six reports submitted to the Commission, was well received at Strasbourg and its high quality recognised by those present. This project has acted as a catalyst in this subject in Europe which was reflected by the heavy demand for places at the symposium.

Certainly a lively debate took place, certainly there was criticism, but it was constructive and useful and in no circumstances could the word "panned" be used to describe the proceedings.

Finally, may I say that the project was firmly based on the real needs of practising lawyers in Europe and that it sought to acquire a deep understanding of the nature of this important subject and has proposed solutions based on the operational requirements identified both in the legal office and in the computer centre providing a legal retrieval service.

This was a European initiative in an important field, based on multi-national co-operation at

the working level. This is the way ahead in Europe which deserves to be fostered and encouraged by all those interested, including, one hopes, a leading technical journal.

CII-HB launches new comms products based on Level 6 mini

WITH an eye to the needs of users of public data networks, notably Transpac in France and the Nordic Datanet in Scandinavia, CII-Honeywell Bull has launched new communications products based on the Level 6 minicomputer.

They are at present available only in CII-HB territory, but will be launched by Honeywell in the US, the UK and Italy when the need arises.

The new products give considerably more substance to CII-HB's communications architecture, and in recognition of this, the company has added yet another acronym, Distributed Systems Architecture, DSA, which becomes the central element of the Honeywell networking philosophy, which is called Distributive Systems Environment, DSE.

The announcement comprises counterparts for two key processors in IBM's Systems Network Architecture portfolio.

The Datanet 7100 is a Level 6-based communications processor designed to perform the same kinds of functions as

IBM's 3705. It can be used to front-end a Level 64 or Level 66 host mainframe, and handle network control, concentration and switching.

The Level 6/DSS, Distributed Systems Satellite, is a terminal controller capable of handling substantial autonomous local processing, making it a direct counterpart of IBM's 8100.

The Level 6/DSS allows terminal users to perform file transfers, execute transactions with database access and remote batch processing on the host mainframe or mainframe.

As with the newly-enhanced IBM SNA, (Software File, June 28) and Univoc's Distributed Communications Architecture, DCA, which features the powerful DCP-40 communications processor (CW, June 14) the CII-HB DSA allows users to construct almost any shape of network.

The announcements from these three manufacturers underline the lack of any comparable offering from ICL.

PO's £1.5m microwave boost

GROWTH of telephone and data traffic throughout the UK trunk network, currently running at over 10% a year, is to be catered for by additions to the Post Office microwave radio network.

Orders worth £1.5 million have been placed with GEC Telecommunications for 6 x GHz radio equipment to be in-

stalled in existing transmission and repeater stations, and a new link will be set up to Sullom Voe in the Shetlands for communication with North Sea oil operations.

The microwave network also carries television signals for regional retransmission, for which it was originally set up in the 1950s.

CORAL NEWS

Coral News appears every quarter to provide users with up-to-date information, news and opinions. Items for inclusion should be sent to the Coral Press Co-ordinator, The National Computing Centre, Oxford Road, Manchester M1 7EO.

STANDARDISATION:
A draft British Standard for CORAL 66 has been issued by BSI and is available at £1.50 from their office in 101 Pentonville Road, London N1 9ND. The standard incorporates comments made on the MICO Official Definition - the Blue Book. CORAL 66 has been accepted by ISO as a candidate for international standardisation and they are circulating the draft for international reactions.

CORAL AVAILABILITY:
From four compilers in 1969, compilers now cover 38 machine ranges and are available or under development for machines from the following manufacturers: CIL, Computer Automation, Control Data, CTR, Data General, DEC, Ferranti, GEC, Hewlett Packard, Honeywell, IBM, ICL, Intel, Kongsberg, Modcomp, Motorola, Nordan, Norsk Ode, Palkin Elmer, Plessey, Prime, Rank Xerox, SEL, Smiths Industries, Sperry Univac and Tams Instruments.

TRAINING:
Courses in CORAL 66 are regularly offered by several organisations including John Bell, CEBG, Ferranti, GEC NCC, Preston Polytechnic and SCL. NCC's Real Time Program Design course was developed for the CORAL 66 groups, and runs for two weeks starting 3rd September and 1st November.

BOOKS:
Two books are available on CORAL 66. John Webb's "CORAL 66 Programming" and Halliwell and Edwards' "A Course in CORAL 66". The books are £5.00 each from technical bookshops or NCC - the publishers.

MASCOT:
MASCOT - Modular Approach to System Construction, Operation and Test - is an integrated approach to design, implementation and testing of real-time parallel processing software based on a form of modular decomposition.

Our 999 in the West Midlands and your call will be handled with the help of CORAL 66. The police there have a real-time system for the control and management of incidents. After successful trials for the Birmingham police, local government reorganisation in 1974 required a change in the way the system was used. The system now includes Coventry and Wolverhampton. The system deals with reported incidents and keeps track of availability and location of resources. It is estimated that by 1983 they may have to deal with up to 600 incidents an hour, and rates for resources of up to 1,000 units on foot, motor cycles or cars.

Incidents can be entered through VDUs situated in any of 32 sub-divisions at the central control room with further VDUs in mobile control. The information eventually consists of details of the incident, action and results and is built up into an incident log. A sophisticated method of recall permits examination of previous entries. The information eventually consists of details of the incident, action and results and is built up into an incident log. A sophisticated method of recall permits examination of previous entries. The information eventually consists of details of the incident, action and results and is built up into an incident log. A sophisticated method of recall permits examination of previous entries.

The system operates on two Ferranti Argus 700s each with 192K bytes of core store and 4.5M bytes on disc. While one processor handles the notification of incidents, the other linked processor handles management information, which is available on a daily, weekly or demand basis. A particular feature of the system is its ability to handle the incident log, the second processor takes over incident handling. The system is a real-time system which includes a time and magnetic tapes which are available between the two processors. The system also handles message switching for the local's telephone network, and is linked to the police national computer at Hendon.

The operating system used is OSC 45 with enhancements by LEASCO.

CORAL 66 was used for all application programming and systems software.

Customers' suggestions have been incorporated in HPAC's latest version of their CORAL 66 Compiler which has been released. The system now has the official blue book definition. The compiler, which runs on ICL 2 and PDP 11 computers, has a base price of £12,000 but is a low-price for existing customers.

Ferranti will supply a computer control system for the new BP Chemicals PLC plant being built in Barry, South Wales. The system will be based on CORAL 66 and will control the plant's 700 processes. A particular feature is that the main computer can maintain control while further CORAL 66 development is possible through a test simulator.

Real-time applications of microprocessors may be developed quicker by a result of software packages released by SOL 110 system CONTEXT (Construction, Execution and Test) allows programs to be developed by a PDP 11 working under RSX-11M, before being downloaded on to a target microprocessor.

As is now usual with computer releases, CORAL 66 is among the compilers initially available on two new systems from Norsk Ode. Norway's mini computer manufacturer. The NORO 100 with 16 bit words is a front-end to the NORO 500 which uses 32 bit words. Both machines can be a main memory which in the case of the NORO 500 can be a massive 22M bytes supported by disc storage of 8.8 gigabytes. Norsk mini computers are available through Richard Nelson (NORO) of London.

RSRE has placed a contract with Computrol Analysis and Programming Limited to develop a set of assessment tests. These will be used to ensure that implementations of MASCOT conform to the official definition. MASCOT itself is a significant step towards standardisation of the approach used for the development of real-time systems for the Ministry of Defence.

Control Data has released its version of the SOL CORAL 66 Compiler to run under the "National Operating System" on its Cyber 170 and 170-700 series of computer systems. This will be available to all Control Data-Cyber customers world wide on a rental or paid no license basis.

John Webb

PEOPLE AND EVENTS

Golden day for Kathy

PICTURED outside Buckingham Palace is Kathy Butler, secretary to the product division manager of Redfern Computers, after receiving her Gold Award certificate from the Duke of Edinburgh. The occasion was the second memorable event for Kathy, who had also attended a special tea given by the Duchess of Norfolk at Arundel Park, where she received her Gold Award brooch.

The award, in the Duke of Edinburgh Award scheme, was given to Kathy for her participation in projects which included working at a national children's home, Crowley hospital and working with epileptic girls whom she took on holiday to Littlehampton. Kathy has also worked with these children independently.

Comshare board appointments

THE UK computer services company, Comshare, has announced the appointment of two deputy managing directors and nine new directors to the board.

Alex Jones, technical director, and Roy Poulton, sales director, have been appointed deputy managing directors.

The nine directors include Nils Birles and Steve Millward, Birles was previously a divisional director in charge of finance and banking. With his promotion he has moved to sales in the South. Millward has been made director of marketing; he was formerly a divisional director for the Central region.

The other new directors are John Cutting, Howard Garelick, Dion O'Leary, Brian Robson, Keith Tolbot, John Taylor and Mike Tait. All of the newly appointed board members have been with Comshare since the company's early days and its European inauguration in 1971.

Malcolm Vickery has been appointed senior systems consultant with Arbat UK. He joined the company when it was formed in 1972 and his previous position was that of senior systems analyst.

Roger Sherrin has been appointed branch manager of Scan On Systems London office at Bexleyheath. He was previously a sales executive with Computer Ancillaries of Egham.

A former member of the operational research groups of Barclays Bank and Air Products, Geoffrey Johnson, has become service manager of SSI International. He is responsible for the educational and application support areas of the Slinplan system.

Franklin Mint, sales manager of SSI is John Savage, who was instrumental in marketing Slinplan in the UK for the past year and previously worked for the Canda Systems group. He was one of the first to market Slinplan in Canada.

Simon Woodcock has been appointed managing director of the company. He has been director of marketing for Lowndes-Alex Computer Service since 1977, and before that was head of management services in Europe for Max Factor and Africa.

SSI announces key jobs

SSI International, formed this year by Lowndes-Alex Computer Service and Scan On Systems Inc, has announced the appointment of three key personnel. The company was formed to market Slinplan, the corporate planning and modelling system. In Europe the Middle East and Africa.

Retail director

NI-WLY appointed divisional director of the retail systems division of NCR is Bill Hawley, who was formerly manager of systems services, support division. He succeeds Jack Poole, who has taken up an appointment as director of retail systems for the Middle East and Africa.

George English, computer centre manager for Compucon in Connock, has been appointed general manager of operations responsible for the overall efficiency of the company's network of regional service centres. Pat Fox has become Cannock centre manager. He was previously the bureau's network controller.

Challenge for charity

EMPLOYEES of computer installations are being challenged by the Thames Valley branch of the Association of Independent Computer Specialists. The association wants computer people to try to earn more money for charity.

The AICS is entering a team in a sponsored wheelchair push which is being held by the Windsor and Maidenhead District Sports Association for the Disabled, on July 14. Any employees of computer installations who think they can raise more money than AICS should contact John Jenkins, 55 Moor Lane, Maidenhead.

George Eaton has been named as vice-president of engineering at Cubic Corp's defence systems division. Prior to this he was director of training systems and logistics for two years.

Chris Phelan has been appointed as sales manager of Cambridge Computer Services, which he joins after eight years with ICL as a salesman and sales manager.

ICL director

ICL has announced the appointment of Donald Fraser as director of personnel, where he will be responsible for the personnel function throughout the ICL group. He reports directly to Peter Ellis, deputy managing director of business strategy and resourcing.

Fraser joins the company from NCR where he was a member of the board of directors and was director of personnel resources of NCR's UK company. Prior to this he was personnel director of Rank Radio International, and was also a member of the board of the Rank Organisation.

Iain Lazenby is appointed interval sales and applications engineer with Portescap UK. He joins the company from Prestel where he was a member of the technical sales department.

John Priestley has joined Lowndes-Alex Computer Service as a sales executive, based at Warrington. He was formerly a senior systems specialist with Kalamazoo in Birmingham.

NCR long drive championship

THE NCR national long drive golf championship has attracted a record entry this year, with over 2,750 participants and the longest qualifying drive being 310 yards, compared to last year's winning drive of 285.

The championship, which is sponsored by NCR and organised by the Journal Golf World, is in aid of the Golf Foundation, and is open to both professional and amateur golfers. The Northern heat will be held in Manchester on July 13, with the three remaining regional heats being held in August and September. The final will take place at Stoke Poges Golf Club on October 1.

Paul Adams has become the first sales executive of Micro Focus. He joins the company from ICL, where he was account sales executive. In his new position he will be responsible for marketing the company's compiler for microcomputers on a worldwide basis.

John Owen has been appointed managing director of Wilcox Computers. A chartered accountant, he joined the company as company secretary. Norman Wilson, the former managing director, is now chairman of the board. Formerly project leader with British Aerospace, John Walmesley has joined Wilcox Computers Research and Development team.

Chairman of Project Managers

THE Association of Project Managers (Internet UK) has appointed a new chairman, Len Connor of the OHSB. He takes over from Herbert Walton, who reported to the AGM both increased membership and a wide range of activities over the past year. The events included weekend schools, seminars, and an international study conference which took place in Jersey.

... THE MOD HAS
CHANGED ITS
FUNCTION...

... TO THE MODD!

Announcing TSB Computer Services' new consultancy division are (left to right): Bruce Cannon, manager of external services, TSB Computer Services; Robert Brotherton, general manager, TSB Computer Services; Colin Somerville, deputy general manager, administration, TSB Computer Services; and Peter John Down, director of services, consultancy division, TSB Computer Services.

TSB sets up financial and networking consultancy

WITH a view to capitalising on its considerable expertise in online real time and financial applications, TSB Computer Services of Cheshire has established a consultancy division.

Plans to offer consultancy services to financial institutions and anyone establishing a real-time network both in the UK and abroad. Overseas it intends to concentrate on the Comecon countries, the Far East and selected African states, but expects to get work in the US as well.

TSB Computer Services has been operating for 10 years, and now handles computer applications for 65% of the Trustee Savings Bank group. It has served the Altrincham Group covering the whole of the north of England and Wales for several years, and has now been joined by the West of England group.

Since 1972 it has run an online real-time service with counter terminals installed in TSB branches, based on five ICL System 4/72 and 4/70 mainframes installed at computer centres in Bootle, Kidderminster, Manchester and York.

Eighteen months ago it became the first UK customer for the Univac 1100/80 large-scale mainframe, having decided to concentrate all the central processing in a single, new, computer centre in Wythenshawe, Greater Manchester.

NEWS IN BRIEF
Seven times more storage

AMONG the announcements accompanying IBM's 4300 launch is the fact that the new 3370 discs can also be attached to a System/38. Offering a sevenfold increase in maximum possible storage — up to 2280 megabytes with four 3370s — the new devices offer a cost per byte of one twentieth that announced with the System/3 Model 8 in 1974.

Quick assembly

TO help eliminate inventory and production control problems, Hubbard Engineering, the transport refrigeration and vehicle air conditioning company, has installed a Nixdorf 88/70 minicomputer at its headquarters in Otley, Suffolk. Hubbard is hoping that the system will allow it to have the necessary components — from a range of 7,000 — available for quick assembly.

Store group order

FURTHER point-of-sale equipment installations have been carried out by department store group Owen Owen, which has bought 44 NCR 2151 PoS terminals.

Plans are being laid to keep the System 4 centres in service with other work once the real-time network has been transferred to the 1100/82 system.

After selecting the mainframe, the company went out to tender for terminals to replace the existing Olivetti devices and finally chose modules from the new Burroughs banking terminal line.

A rigorous step-by-step approach to hardware selection — developed to make sure that the right machine to replace the System 4s was chosen, refined during the terminals selection process and since used in the choice of an automatic teller terminal for a pilot trial — is one of the first services on offer from the new consultancy. It consists of a set of three documents, and one day's consultancy is included in the price.

Five key areas have been identified to spearhead the services offered by the TSB division. It will offer advice on strategic issues — the vital question of whether an application is worth putting on a computer or not. If so, it will then provide planning and design assistance, and transfer techniques it has developed for its own use. One of these is optimisation of operating systems for a transaction processing environment.

In the case of the Systems 4s, TSB achieved a remarkable increase in the transaction handling capacity — 14 transactions per second instead of six — by stripping out redundant parts of the J operating system.

Similar optimisation is now under way on Univac OS/1100, and the projected capacity of the 1100/82 system is 70 transactions per second.

The consultancy will also be prepared to adapt existing TSB systems — and the availability of the low-cost 1100/80 computer from Univac will make a subset of the new system particularly attractive — but there are no plans to undertake major software development contracts.

Training, and experience working with the TSB team on current systems will also be offered — and has already been given to employees of one overseas client.

TSB has not identified the client, but it is understood to be one of the major Iranian banks, which is also equipped with a Univac 1100, and implemented a pilot online system with TSB assistance. The collaboration has been suspended since the homecoming of Ayatollah Khomeini to Iran, but may restart once order is restored.

In general, TSB hopes to work with a local partner on foreign contracts, and sees good prospects for business in Eastern Europe with banks which are ICL customers. This would involve transfer of expertise and possibly large parts of the Sys-

Solicitors say plans for registration of data banks are ill-considered

UNCERTAINTY and confusion over registration of data banks will result if the Data Protection Committee's proposals are implemented as they stand, claims the Law Society in a preliminary memorandum on the proposals to the Home Office.

Many aspects of the recommendations have not been properly thought out and in places conflict, the Society asserts.

The Law Society, which is the solicitors' professional association, declares itself in favour of the principle of having data protection legislation, and of the flexible approach proposed by the DPC whereby different applications would have different regulations covering them. However, it points out that of the 50 different classes of application listed in the DPC report, some are defined by type of data, some by the type of user, and some by the technology.

"This seems," the memorandum says, "to open up a prospect of a multiplicity of different codes of practice which may conflict or overlap, with the possibility that several different codes might govern a single application." Thus users will not be able to tell which regulations they must follow. This needs to be clarified as a first priority, the Society says.

There is also confusion, in the Society's view, over what applications would have to be registered and whether unregistered applications would be regulated. It proposes a two-tier registration system, with the lower tier for minor applications for which no code of practice is needed.

The Society expresses concern over the principles that data should only be used for purposes authorised when it was collected. There are many appli-

cations where no purpose is specified. It says, and would prefer the principle to be "personal data should be handled for reasonable and legitimate purposes only." The Society does not, however, go deeper into the question of how the vague terms "reasonable" and "legitimate" would be defined.

The Society is also worried about how judicial control over data protection would work, since the powers the courts would have over the Authority's actions are unclear, and the rights of a data subject who thinks he is not being properly protected are similarly confused. There would be a need for effective control over the "very extensive" powers of the DPA. Difficulties are envisaged over conflict between the DPC's "flexible approach" and more rigid rules that may be laid down in international conventions.

They give instant relief to your mainframe.

If you're suffering from mainframe overload, schedule delays and back-ups, or pain from high communications traffic, Data General can offer you instant relief. With the Eclipse decentralized systems of distributed data processing.

Our critical difference is this: we put the actual data processing capability and your data base into your hands where and when you need it.

Eclipse. New tonic for tired systems

With the Eclipse system, you and your colleagues can collect and process data on the spot, up-date simultaneously and access all up-dated information immediately, at any terminal, at any time.

Eclipse offers you better balanced hardware: powerful processors with 10 megabyte per second input/output channels — powerful and versatile interactive software systems — ability to process batch jobs simultaneously with real-time treatment.

What else?

Eclipse dialogues with other computers and speaks universal languages like ANSI 74 COBOL, PL/I and RPG II. Virtual COBOL lets you run any length programme from any terminal where and when you want to.

Eclipse can help you now, with a complete family of compatible distributed data processing systems ranging from £41,000 to £202,000.

A NEW GENERATION OF COMPUTERS. 63,000 ARE NOW AT WORK IN 57 COUNTRIES.

Marketing Communications, Data General Limited, 4th Floor, Hounslow House, 724-724 Lindford Road, Hounslow, Middlesex TW3 1PD. Tel: 01-872 7445.

A COMPUTER WEEKLY HANDBOOK

BASIC FILE DESIGN

BY OWEN HANSON

This book provides a brief but authoritative review of the most frequently used file organisation techniques, and of related subjects such as data security and software aids.

The file designer is shown how to choose between the available techniques on the basis of known or forecast information rather than rule-of-thumb, and methods of ensuring that the correct choice has been made are given.

New work carried out by the systems analysis division of the City University Business School, London, is linked with previously published information to provide methods of optimising the performance of sequential, direct and indexed files. Marked improvements can be achieved, particularly with direct files, which are worthy of wider use than at present.

Students of data processing, lecturers and practitioners should all find the book invaluable, particularly because it provides a great deal of information and many illustrations in a very compact format.

COMPUTER SHIFT LEADER SUSSEX

A vacancy has arisen with a well-established and expanding electrical company in a beautiful part of Sussex.

This might suit either a current shift leader or an operator with two years' experience wishing to take the next career step.

Reporting to the Chief Operator the Shift Leader will be responsible for running an on-line Production Control System with 31 terminals plus some high work. Shifts of 8-5 and 4-12 are worked on alternate weeks.

A Burrells 3700 is the in-house computer but other experience might be considered as the company are about to install a 2030 within a year.

Excellent conditions with a negotiable salary and generous assistance with relocation if applicable are offered. Overtime is available.

For full details and early interview contact:

FIFE REGIONAL COUNCIL — FINANCE DEPARTMENT SYSTEMS AND PROGRAMMING SECTION

SYSTEMS ANALYST

Salary Grade — A.P. V £6,505/£6,088 (inc. supplement)
Due to internal promotion a vacancy exists for a systems analyst to join one of our Project Teams.
Applicants should have at least 2 years' programming experience and systems design experience. They should be able to demonstrate an ability to work in a team environment. A professional qualification would be an advantage.

COMPUTER PROGRAMMER

Salary Grade — A.P. I/IV £3,861/£3,403 (inc. supplement)
Due to an internal promotion a vacancy exists for a computer programmer to join one of our Project Teams.
Applicants should have at least 2 years' experience of programming in COBOL. A wide variety of local authority work is available on the staff of the Regional and District Councils. Career prospects are excellent. Please apply in person to the relevant grade. Interviewing directly or indirectly will be necessary.
Applications and further details may be obtained from Regional Personnel Offices: Fife House North St, Glenrothes, Fife, KY4 411. Tel. 241 6. To whom completed forms should be returned no later than 30th July 1979. Please quote Ref. Number RP/49/58/CW.

Manchester Technical Authors

(to £6,500)

We are looking for a few highly competent Technical Authors to join computer design teams working on advanced digital equipment and software projects. They will be expected to work with a minimum of supervision, gathering information as projects evolve and producing finished technical literature.

Applicants, male or female, should either be experienced technical writers or have several years' industrial experience preferably in digital electronics or programming and the proven ability to write clear concise English.

The posts carry attractive salaries in the range £4,000 to £6,500 and a productivity bonus scheme is in operation. Relocation expenses are available for staff coming from outside the area.

Ferranti Computer Systems Limited is a leading British manufacturer of real-time computer systems with a world wide reputation for quality and reliability. The vacancies are at our Wythenshawe Division on the South Manchester/Cheshire border within easy reach of open country and good residential areas.

Apply to Mr. W. L. Robinson, Ferranti Computer Systems Limited, Simonway, Wythenshawe, Manchester M22 5LA quoting reference 79WD7/CW

WOULD YOU LIKE A PROGRAMMING OR SYSTEMS
JOB THAT PROVIDES A ROVER 3500 AS A
COMPANY CAR?

Well, we don't know of any, so if you do give us a ring and let us know where they are — whilst you wait there why not contact us anyway if you are interested in seeing what's available on the market. Our first class services can work for you as well as employers — we can't possibly advertise all the vacancies and why pick 2 out of 200 when those two might not apply to you anyway.

If these geographic areas interest you, telephone DON KNAGGS now on WORCS. 427077 JBEWLEY 400036, evenings after 7 p.m. and w/e or write to THE MOUNT, 1 ST. JOHNS, WORCS.

Technical Group Manager

Salary Range £7,750 to £9,088

Our Technical Design Branch located in Nottingham requires a Technical Group Manager who will be responsible for all design and implementation aspects of a range of computer projects.

The computing equipment used includes ICL 2980 and IBM 360/370 mainframes and a number of mini-computers, using batch, RJE and on-line facilities for system development and production processing.

This position offers an excellent opportunity to control a wide variety of projects and requires extensive practical experience of all facets of computing with particular emphasis on technical design.

There is a contributory pension scheme and the transfer of existing pension rights can, in most cases, be accepted. There are also free and reduced rate rail travel facilities.

Applications stating age, education, qualifications and experience should be sent to:

Headquarters Staff and Services Manager,
British Railways Board Headquarters,
222 Marylebone Road,
London NW1 6JJ
(quoting reference RB201).

UNIVERSITY OF ESSEX Department of Electrical Engineering Science

Senior Research Officer

to work on all aspects of microwave radar based projects in the Essex Electronics Centre. The Centre undertakes a wide range of projects contributing to the application of electronics to problems encountered in industry.

Candidates should be qualified in electrical engineering or computer science to degree level and have practical experience in industry would be an advantage, but not essential. This post offers a chance in recent graduates to be involved in real industrial problems while benefiting from an academic environment. Salary will be in the range £4,332 to £7,145 according to experience. Appointment tentative immediately.

Applications including a curriculum vitae and the name and addresses of two referees, should reach the Registrar (AG/88/CW), University of Essex, Wivenhoe Park, Colchester CO4 3SQ, from whom further particulars may be obtained by 2nd August, 1979.

Weighting

New entrants enter at the minimum of the scale.

Equipment consists of an ICL 1904S with 10 EDS 904 runtimes under the Georgia 3 operating system with communications facilities, an NCR microfilm processor and Rediff key-to-disc system.

As well as the Payroll, Accounting, Medical and Scientific applications, staff are required to support a variety of mini-computers installed in hospitals and laboratories around the Region.

The main programming languages are COBOL, FORTRAN and PLAN. Appropriate training will be given as required. Flexible system around a 36-hour week.

Applications forms and further particulars from the Regional Personnel Officer, North West Thames Regional Health Authority, 40 Eastbourne Terrace, London W2 3QB. Telephone No. 01-262 8811 Ext. No. 281 quoting the appropriate reference number. Closing date: 27 July, 1979.

JBA

Electronic Office/Mailing System

Central Holland gross to £20,000*
A new development team is to be formed by one of the world's leading software houses. Computer Sciences Europe to design and develop a complete word/text processing system. This is real "leading edge" technology, representing a major push into the automated, electronic office age.

The range of software development experience required from the team as a whole, is as follows: multi-tasking; data/file management; network planning; word/text processing; graphics; data communications involving protocols such as SDLC or HDLC.

*On moving to Holland, the top 35% of gross salary is exempt from tax — extremely valuable! If you would like to contribute to the project and would like a permanent, career-orientated position into the bargain, please now for more detail.

Contact: Andy Wright

Business Analyst (Minis)

Berkshire

Neg £8,000 + Benefits

This is an outstanding opportunity for a successful Analyst/Programmer to move on to pure Business Analysis. You will be given the chance to design and implement new and extremely complex financial/accounting systems around a worldwide network of minis. This will necessarily involve overseas travel (to the U.S.A. and Far East) to a limited extent — ie NOT plane-hopping or extended stays abroad — to help implementation at each site.

Whatever your hardware background, if you understand the concepts behind networked minis and have a sound accounting systems knowledge, this represents a real career building move.

Company benefits include an excellent pension scheme plus medical (like BUPA/PPP) insurance and free life assurance schemes. Generous relocation assistance is also available if required. Additionally, the initial starting salary will be reviewed within 6 months.

Contact: Andy Wright

GERMANY

Consultants

NETT £20,000 to £32,000

Our client has an immediate need for real in-depth expertise of VTAM, TCAM, and IMS systems, e.g. not a user or developer of associated applications. Experience of data communications or SNA is an extra advantage. The successful candidates will be fully conversant with technical internal software, debugging and tuning. The consultancy status truly reflects the level of the positions, where technical knowledge will be sought and ability fully utilised. Long term prospects and high rewards are offered.

Contact: Mike Creamer

For further information on any of the above vacancies, please contact the appropriate consultant.

If your qualifications do not match the above positions but you are seeking other opportunities please contact us anyway.

JAMES BAKER ASSOCIATES, International Personnel Consultants,
16 Maddox Street, London W.1. Tel: 01-491 4478

Analyst Programmer

Midlands

c. £7,000

A large engineering organisation with world wide data processing activities wishes to recruit an Analyst/Programmer to join an existing systems development group.

Applicants should have at least three years in commercial applications development, ideally as a senior programmer, with some recent design experience. Knowledge of IBM 370 systems is essential, INIS and DLI experience is desirable.

This is an outstanding opportunity for a professional to be involved in the implementation of a multi-national data base.

Contact: Jim Baker

INSURANCE COMPANY

Systems Analysts

South of England

Salaries up to £8,900 + mortgage subsidy + non-contributory pension + free permanent health scheme + low interest loans + subsidised canteen and sports/social club + all relocation expenses + other benefits.

A very attractive prospect for career-minded Analysts, keen to progress in a growth-orientated modern company putting in database and T/P systems, promising exciting design and development work well into the 1980's.

We are keen to hear from Analysts who have a sound business background, a good knowledge of COBOL and experience of system design over two to three years, ideally in an accounting, financial or banking environment.

Contact: Mike Creamer

Operations Manager

West London

To £5,500

In order to successfully implement the installation of a new mini computer, our client is now seeking an Operations Manager to be wholly responsible for day-to-day running of the site. The principle areas of responsibility will be scheduling — screenmix work flow and supervising a staff of production/data controllers. However, the successful candidate can look forward to progressive involvement in new systems development.

Applicants must be able to show a sound background in all aspects of computer operations and control, and have the stature and self-confidence to represent the data centres interests effectively, at all levels.

Bored with your present job?
Then come and work for

XENOTRON

We are a small independent company, manufacturing a specialised display terminal for the newspaper industry. Opportunities exist for intelligent, self-motivated people to join our development, production and service departments.

Development Engineers
Production Test Engineers

and
Field Service Engineers
and the software department as

Installation Programmers

and
Development Programmers

Engineering applicants should have a good background in both Analogue and Digital Electronics, and familiarity with OLC LSI/11 and/or Zilog 280 processors would be a distinct advantage.

Installation Programmers should ideally have experience in both commissioning and typecasting, but applicants with experience limited to either field will be considered if they can demonstrate an ability to acquire the necessary competence in the other field. Development Programmers should have specific and solid experience of programming Z80.

All jobs offer scope for personal development and foreign travel (Europe and USA) combined with the satisfaction of working for a small closely knit company situated in a very pleasant area of mid England.

EXECUTIVE

SYSTEMS ANALYST ANALYST/ PROGRAMMER

£6452-£6960

£5526-5958

The Executive is a user of the West Yorkshire Joint Computer Committee's IBM 370/158 operating under OS/VS.1. Processing of the Executive's systems is from several remote job entry terminals, and interactive terminals are used for program development.

SYSTEMS ANALYST

Must have had experience in the preparation of a major system, and been involved from feasibility study to systems design and implementation including user training.

ANALYST/ PROGRAMMER

Two years' programming experience in COBOL and a working knowledge, or desire to learn systems design and implementation. Applicants with other than IBM experience will be considered for re-training.

The Company

The Executive offer the following benefits: modern working conditions, canteen facilities, 32 days' paid holiday, concessionary travel and a good pension scheme.

The Location

Wakefield — Cathedral City of West Yorkshire close to M1 and M62 within easy reach of National Park and East Coast Resorts. Assistance with relocation expenses in appropriate cases.

Application forms are available from the Personnel Manager, WYPTE, Metro House, West Parade, Wakefield WF1 1NS, (Tel. 0924 78234, Ext. 284) to be returned no later than 30th July, 1979.

**Systems
Analyst
W. London
To £6250**

A U.S. multi-national manufacturing company has a major subsidiary in W. London with an expanding ICL System 10 installation. Due to the rate of growth of the organisation (now £30 million turnover a year) there is a tremendous increase in demands placed on the department of a managerial information and inventory control nature.

If you have a minimum of 2 years in OP with one reasonable sized system designed and implemented, then the company will be very interested in seeing you. This could be an ideal opportunity for an Analyst/Programmer who wishes to move up to Systems Analysis work and who can make a major contribution to the planned growth of the installation.

Excellent company benefits include subsidised canteen facilities, contributory pension scheme, and contributory life assurance. Relocation expenses will also be generous. So be a big fish in a small pool and apply now!

MYRIAD PROGRAMMERS

GAIN ANALYSIS EXPERIENCE

N.W. LONDON c. £6500

Using the computing facilities of a medium range IBM computer, exciting opportunities have arisen within our client's installation for programmers to develop their careers in analysis. Joining a young enterprising team of professionals, successful applicants will be encouraged to contribute effectively to the design and specification of projects as well as the programming effort.

The company is a very successful manufacturing organisation maintaining an impressive growth rate over recent years. This growth is reflected in the recent introduction of their new computer and the variety of major systems planned to be developed.

Ideal candidates will be able to offer good commercial programming experience supported by the desire and potential to advance into an analytical role. After induction to the company's commercial procedures and awareness of the data processing standards adhered to, every opportunity will be afforded to applicants to apply their skills in developing systems from broad concepts already planned.

Range of company benefits are associated with these vacancies further enhancing the opportunities available to the career minded professional.

COMPUTER PROFESSIONALS

YOUR NEXT CAREER MOVE

At Esso Chemical Limited, we have just embarked on one of our most ambitious DP projects. We are taking a fresh look at our approach to information systems on our manufacturing plants using the latest computer technology to create a highly integrated data base. This will be the source of management information and the base for development of advanced applications. The project will use the latest computer hardware and Esso's worldwide experience of computer project development. The men and women who participate in this project will be in on the ground floor of this challenging new activity and they will be expected to develop as professionals with the project.

Senior Programmer
The successful candidate is expected to become a key member of the programming group and should have the potential to lead and co-ordinate projects.

We are looking for a young programming professional with at least three years experience, ideally on a large (IIM) configuration, who has worked with PLI, VM/CMS and data base applications. A degree in Computer Science, Engineering or a numerate discipline is essential.

Systems Analysts
You will be working closely with users who are engineering professionals, and you should have good communication skills and the potential to lead a team in the future. A degree in an Engineering related subject is essential with at least two years experience in a manufacturing or technical environment. A programming background would be an advantage.

Communications Systems Engineer
This is a unique opportunity for a proven engineer to take overall responsibility for implementing, commissioning, developing and supporting all communications on site. You should have a degree in Computer Science or equivalent and at least 5 years experience in telecommunications and/or process control software systems. Experience of Process computing and time software systems, IBM Terminal-teleprocessing systems would be an advantage.

Great opportunities certainly, but a great challenge too. You will have a lot of personal responsibility and your ability and effort will be one of the keys to ensuring a successful project completion.

That's the way everyone works at Esso Chemical Ltd. It's part of our management philosophy - to give young people real responsibility, with equally real rewards to match. Which is why the salaries that go with these jobs are really attractive and why our benefits package includes generous relocation expenses to this attractive part of the South Coast which has the sun on one side and the New Forest on the other. So you can enjoy wide open opportunities in a part of the World that still has plenty of wide open spaces.

To find out more about the opportunities we are offering, telephone Howard Winters, Employee Relations Adviser on write for an application form to: Esso Chemical Limited, Esley, Southampton, Tel: Southampton (0703) 891822.

SYSTEMS PROGRAMMER

The Onesbury Laboratory, an establishment of the Science Research Council, situated in the north Cheshire countryside is constructing a Nuclear Structure Facility. Known as the NSF, the project is based on a tandem electrostatic accelerator which will be the largest in the world. When completed it will provide a facility of world standard which will attract users from both the national and international scientific communities.

The NSF machine represents a significant step forward in the technology of this type of accelerator and requires a powerful computer control and monitoring system. It is in fact the first accelerator of its type to be designed with comprehensive integral computer control.

The control system is based on a central Interdata 7/32 computer with up to 10 peripheral Interdata 7/16 computers. A vacancy exists for a Systems Programmer to join a small team of computer professionals designing and producing the software to control this network. Many problems associated with interactive colour displays, plant data handling and the operator interface, make particularly challenging by the distributed nature of the system, remain to be solved and a considerable amount of programming in both high and low level language will be required to complete the system. The post will provide a sound base for a career in computer control systems in general.

Applicants must possess a good honours degree or equivalent and experience in systems programming. The appointment will be made either at Scientific Officer or Higher Scientific Officer level according to qualifications and experience on the following salary scales:

Scientific Officer £2,839 to £4,415
Higher Scientific Officer £4,101 to £5,448

There is a non contributory superannuation scheme, a generous leave allowance and a flexible working hours scheme. Closing Date: 10th August, 1979.

Write to: Telephone: 0925 85000 ext. 487. For an application form quoting reference number DL 614, 1-30 to

The Personnel Officer
DARESBURY LABORATORY
Science Research Council
Daresbury, Warrington WA4 4AD

Sales Executives-
Bored with going
round in circles?

Win with Data General.

Join a Grand Prix Team, who recognise that to take the checkered flag you must have a fine team of Specialists and a car with power and performance second to none.

DATA GENERAL can give you a product range that has been designed and engineered for today's needs in mind and they are currently investing a substantial proportion of their revenue in research and development - pitstops are not necessary.

They are without doubt market leaders in Europe and are currently capturing a high proportion of computer sales in commercial, industrial, scientific and technical areas. Constant announcements of further enhancements of their equipment enable them to penetrate into the market with impressive and extremely competitively priced systems.

DATA GENERAL is more than aware of the importance of good people and this can be seen in the company's substantial marketing success and the well motivated - well rewarded team of professionals currently enjoying a working environment that promotes original thought and encourages flair.

We are now looking for self motivated and confident successful mini-computer Sales Executives who are aged between 25 and 35 and who can bring to DATA GENERAL further enthusiasm and commitment.

In return you will be given a substantial income package with guarantee plus company car and an important position offering you tremendous scope for personal achievement and development.

These positions are located in London, North East England (based at their Manchester offices) as well as Bristol.

If you think you have got what it takes to join a winning team then contact Richard Champion without delay for an immediate confidential interview on 021 236 3781 (24 hour answering service) or Hagley 884166 (evenings and weekends).

All replies will be treated in the strictest confidence.

Here's a computer servicing job you'll feel at home with.

An interesting and challenging job which involves countrywide travel.

Marconi Avionics is one of the world's leading and most successful electronics companies and we make extensive use of computers in virtually every area of our operations. At our pleasantly situated establishment in Borehamwood Herts. we have six GEC 4080s handling a wide variety of vital work, so we need to keep them running at a high level of efficiency at all times. And that's where you come in.

Our immediate need is for men and women who have experience of computer maintenance, fault diagnosis and re-education on both mainframes and peripherals and including disc drives. Ideally you should also have some knowledge of data communications and if you have completed an appropriate course of training in computer maintenance, so much the better.

So join us here at Marconi Avionics and enjoy a good salary, attractive benefits and a stable and interesting working environment.

We can, of course, assist you with relocation expenses where appropriate.

Phone Chris Till on 01-953 2030 or 3449 or write to him at Marconi Avionics Limited, HRT 19 4ST, 1, Upper Way, Borehamwood, Herts WD9 6 HR. Or call 01-207 3455 at any time day or night and we'll send you more information. Please quote reference MV 79123.

FINANCIAL SYSTEMS ANALYST

Croydon c. £7,500 + many company benefits

The company, Britain's largest sugar producer, is introducing a DEC minicomputer in its central finance area. This machine is the first stage in establishing a distributed network which will form a company-wide financial database.

The successful applicant will monitor the implementation of a management information and accounts system. In addition, he/she will be responsible for all future development in the financial area and the re-evaluation of existing software.

This is a management appointment and the associated salary in communication are considered of equal importance to technical ability. Candidates should be at least 24 years old with a minimum of three years' experience of programming and systems analysis, preferably gained in accounting applications.

The company offers excellent working conditions and benefits which include four / five weeks' holiday, free meals, non-contributory pension scheme, free life assurance, private medical treatment and a financial mortgage scheme.

LONDON BOROUGH OF BROMLEY COMPUTER APPLICATIONS

ARCHITECT'S DEPARTMENT
Salary up to
£8,348 inc.
(R.F. F.31)

The successful candidate will be responsible to the Chief Administrative Officer for developing the use of the present computer terminal as well as developing the use of the computer techniques within the Department. The Council's computer is an ICL 19031 128K installation and is under the control of the Borough Treasurer.

The successful candidate must have considerable experience with computer techniques and be able to write programmes dealing with technical subjects. Therefore a qualification in the building industry would be desirable.

Commencing salary dependent upon age, qualifications and experience. In approved cases, assistance will be given towards reasonable removal and resettlement expenses. A 19-day four week cycle of hours is in operation.

Closing date 26th July 1979.

Application forms from the Assistant Chief Executive (Manpower), Town Hall, Bromley BR1 1SB. Tel: 01-464 3333, Ext. 3418.

Scicon

Consultancy in Defence
£5,500 to £11,250

Scicon, a leading international computer systems and consultancy company, requires experienced professionals for an expanding Defence systems group. Successful candidates will be involved in design analysis, trials analysis, performance assessment and simulation of complex systems.

Applicants should have a good honours degree in a numerate subject and have at least two years' experience in one or more of the following areas:

- * HIGH LEVEL LANGUAGE PROGRAMMING FOR SCIENTIFIC APPLICATIONS
- * SYSTEMS ANALYSIS/DESIGN
- * MATHEMATICAL MODELLING TECHNIQUES
- * STATISTICS
- * SIGNAL PROCESSING
- * COMPUTER SCIENCE FOR SCIENTIFIC APPLICATIONS

Scicon offers outstanding career opportunities which span a field from programming to management with the emphasis being placed on the ability to run projects of varying size and application. Promotion reviews are merit based, and salaries are based on both past experience and future potential. There are a number of fringe benefits available, as befits an international company.

Information Processing People

88 Pentonville Road, London N1 9AF. Tel: 01-603 7335

We're successful because our staff are

Data Logic operates at the forefront of computing, applying the very latest hardware and techniques to practical commercial problems. We cover the range from mainframes to the smallest computers. We are leaders in the use of microprocessors for applications that not so long ago required far larger machines.

Many of the systems we supply go far beyond providing extra speed and cost savings. They will revolutionise the way the user organisations operate. Several projects involve dispersed networks of ten or more minicomputers. Our largest turnkey system incorporates twenty-three machines and close to three hundred display terminals across the country — a totally new system which will serve almost every function within a leading company. A new police contract involves the first use in the UK of a mini for a complex data retrieval

application — with our own advanced methods for rapid, generalised record searches.

The exceptional scope and quality of work is important to our staff. We can match their individual experience to their projects. Equally, we can ensure that each project adds to their experience. As computing itself develops, so do they.

Over the past year Data Logic has grown dramatically in size, in scope of work and in reputation. Our expansion has meant unrivalled opportunities for career progression. We are not prepared to promote people before they are ready for it. But when they are ready — and we give all the assistance we can — the positions as senior programmer, senior analyst, project manager and consultant will be there waiting for them.

The reason is simple. We know that we are successful only if our staff are.

Senior Software Staff

(Ref PS/32/CW) For mainframe, mini computer and mixed processor systems, usually supporting terminal networks. Increasingly Data Logic's turnkey projects involve minicomputers at multiple sites.

Applicants must have at least five years experience including some work in consultancy, system design or team management. Substantial knowledge is required of either high level language implementation on a leading mainframe or assembler language development on DEC, Data General or other leading minicomputers. We are especially interested in experience in:

- database systems
- distributed systems
- data communications
- telemetry
- operating systems design and implementation.

Salaries will be highly competitive and a company car is provided to staff at senior team leader level or above.

There are vacancies at our Greenford, Birmingham and Manchester offices.

Programmers

(Ref PS/33/CW) For both mainframe and minicomputer projects which include commercial applications, monitoring and control, and scientific analysis.

Applicants should have at least 18 months programming and/or analysis experience in high-level language or assembler on any leading mainframe or minicomputer.

This is an outstanding opportunity to gain experience in the development of complex high performance software. Our programmers work in small teams, taking considerable responsibility for distinct areas of the total system.

Salaries will be highly competitive. Vacancies exist at our Greenford, Birmingham and Manchester offices.

Data Logic

Our profit-sharing scheme ensures that staff benefit from the company success they create. Regular career appraisals provide a direct link between individual achievement and personal rewards.

NHK TELEFLEX MORSE LTD JAPAN
MORSE CONTROLS CALIFORNIA
MORSE CONTROLS HUDSON
TELEFLEX MORSE LTD ENGLAND
MORSE CONTROLS FRANCE
INCOM SINGAPORE PTE LTD SINGAPORE
TELEFLEX MORSE PTY LTD AUSTRALIA

Teleflex Morse Limited, a wholly owned subsidiary of Morse, possesses a long tradition for the design, manufacture and marketing of mechanical remote controls for the marine, architectural, automotive, industrial and aviation markets. Their product range includes: engine and steering control for boats; fuel throttle mechanisms for trucks; in aircraft crew seats and inertia reel safety harnesses. It is a company with the capability and technology for innovation, design, development, manufacture and marketing which has enabled it to become amongst the world leaders in the field of mechanical remote controls. It serves the world markets through its own subsidiary activities in Sweden, Australia, Germany and Japan, in conjunction with its sister unit, Morse Controls in Hudson, Ohio, U.S.A., and numerous distributors located in many parts of the world. The Data Processing Division is located at European Headquarters in South-East Essex. It offers a complete facility in both production and management service areas of the organisation. At present the company utilise IBM 370 mainframes and delivery of their new range of IBM 4300 Series in 1980. Accordingly they now wish to appoint additional operations and programming staff.

Operations
The Company are seeking an Operations Supervisor and an Operator who will be trained to work with their new 4300 series machine. Applications are invited from both senior operators and operators preferably with an IBM 370 background and a knowledge of OS/VS. Both these non-shift positions offer the chance of advancement and also the opportunity to work with the latest IBM Hardware.

Systems
Teleflex Morse are now seeking two people for their programming department, a Senior Programmer and a Programmer. Candidates should offer sound COBOL programming experience preferably gained in a manufacturing environment. For the senior position IBM AS/VS subject would be an advantage. The position will be offered to those applicants who are self-motivated and have the potential to develop a successful career with a forward-looking organisation.

To £6000
To £7500

The Company offer highly competitive salaries, further enhanced by a comprehensive benefits package including assistance with education.

MYRIAD APPOINTMENTS LIMITED Please telephone for a confidential discussion or write to: 36 Fleet Street London EC4Y 1AA Tel: 01-353 0981

SYSTEM ANALYST WEYBRIIDGE — £5500

After subsidiary of large European group in process industry currently running ICL 2903 with the help of small. Initially learn seek's second-hand command. Ideally you have gained experience at the smaller end of the computer range, and are willing to broaden your horizons. A challenge to help employers new local and remote systems awaits you. Some knowledge of operating and programming a 'disturb' area.

Benefits include free life assurance, comm. pension, four weeks holidays. For further details ring now.

LANCHESTER POLYTECHNIC

AT COVENTRY
FACULTY OF APPLIED SCIENCE
Department of Mathematics
and Department of Computer Science

EXPERIMENTAL OFFICER

(3 posts) £5233-6868

THE JOB: The Officer will assist academic staff of the above Department in all aspects of research work and laboratory equipment development.

THE PERSON: Should possess an honours degree in an appropriate subject and should have four to five years' research/industrial experience.

For application forms and job specifications please apply in writing enclosing a large stamped addressed envelope to the Personnel Officer, Lanchester Polytechnic, Priory Street, Coventry CV1 8PE, returnable within ten days of the appearance of the advertisement.

The Company is about to embark on a new phase of development and is due to take delivery of a large IBM System 34 during 1980, consequently we now wish to appoint a

Programmer/Analyst

The person (male/female) appointed to this key position will report directly to the Data Processing Manager and ideally should have some experience of systems analysis and design, and RPG II programming background together with a knowledge of both production and accounting oriented computer systems. An understanding of business procedures is essential and some knowledge of integrated on-line systems would be an advantage.

The work will cover all aspects of systems development from feasibility through to implementation and continued maintenance.

Remuneration will be competitive and in accordance with experience and ability. The Company offers very pleasant working conditions including 'flexi-time' working hours.

We are a member of GKN, Britain's largest International Engineering Group, manufacturing a wide range of arc welding equipment, accessories and consumables.

Technical Support Engineers

There's a rewarding life waiting for you in Europe

Due to the expansion of our European operations, we need a number of hardware and software TSE's to join our fast-growing Frankfurt-based team.

Hardware TSE qualifications:

Minimum 2/3 years experience in large and/or small systems. You will be supporting our European software training programmes. Fluency in one or more languages would be an advantage... however language training will be given where required.

Software TSE qualifications:

You must have experience in operating systems in large computers or with mini's. Ideal position for systems analysts or operating systems engineers. Languages not required.

This is one of the most attractive career opportunities we've ever offered to Support Engineers both in terms of career opportunity and lifestyle. Training will be in the States. We will pay all re-location expenses for you and your family. To give your family every opportunity to fit into the local community we will arrange and pay for German lessons for you and your wife. Obviously finding the right accommodation is vital as we look upon these as long-term appointments. Consequently we will pay your expenses to look for suitable accommodation once contracts are signed.

The salary is around 4,000DM per month with an extra bonus monthly salary each year.

If you'd like a more rewarding life for both you and your family, get in touch. Contact Janet Field at the address below or telephone her on 01-572 7455.

PROGRAMMER

with systems potential

c. £8,000

We are looking for an experienced programmer interested in expanding his/her career into systems work.

The post will initially suit someone with about two years' COBOL programming experience who is now looking for a wider job responsibility.

The job requires both the ability to work with minimum supervision and to communicate effectively with all levels of staff and management in an industrial environment.

The Company, which is part of a major UK Group and situated in North East London, close to the Essex border, is entering the next phase of computer development. The person appointed will report directly to the O.P. Manager and the post offers both a high level of job interest and very attractive terms of employment.

Please write giving details of experience to:

WALTER JUDO LIMITED (Ref. L215)
(Incorporated Practitioners in Advertising)
1a Bow Lane, London, EC4M 9EJ

I'm young and ambitious, I've been in programming long enough to know that I want to broaden my horizons. I'm a customer service representative. I now want the chance to develop my career. I've been analysing systems for a couple of years now and I want to start using my skills in a more practical manner. If this is you (or anything like you) read on. Intotech International, world leader in DP Education, has launched an exciting new development in its education and training programme and are looking for two young and ambitious people in their mid-20s to become

EXECUTIVE CONSULTANTS

For the right people this will be a unique opportunity to get in on the ground floor of what is one of the most important developments in this market.

The job will be to service a carefully selected list of clients; understand their business; anticipate their training needs; advise them on what action should be taken and act as the crucial link between them and Intotech's facilities.

Located at Maidenhead (beautiful River Thames, excellent road and rail connection, peace and quiet) in modern offices, the job offers excellent salary and prospects.

Call John Spencer now on Maidenhead (0288) 39101 or write giving full details of your career to date to: John Spencer, Director of Education and Training, INFOTECH INTERNATIONAL LTD., Nicholson House, Maidenhead, Berkshire SL6 1LD, England

DRING PACKAGING GROUP

ASSISTANT D.P. MANAGER/PROGRAMMER

Southern Holiday Resort

We are one of Portsmouth's largest companies and manufacture a complete range of packing products.

Due to the expansion of our D.P. Department we require an Assistant Manager/Programmer with a minimum of 2/3 years Cobol experience.

Applicants with experience of a Burroughs 1726 installation preferred, but consideration will be given to applications from suitably qualified persons who have the knowledge of other installations.

This appointment offers an interesting and challenging position and would suit a talented person who has the ambition to progress within a company which has a fast moving planned D.P. development programme.

Salary will be negotiable and in addition we offer first class employment conditions. Pension and Sick Pay Scheme.

Interested, please contact our Personnel Department, J. Dring Limited, The Airport, Portsmouth, Telephone Portsmouth 63272, for an application form.

UNIVERSITY OF ESSEX

Senior Consultants

London W1.

c. £10,000

We have been retained by one of the largest Software Houses in Europe to assist with the appointment of three senior professionals into their consultancy group. The work includes taking responsibility for sophisticated projects, carrying out feasibility studies and implementing complex systems in a wide range of locations throughout the UK.

Candidates must have at least six years in the d.p. industry with four spent in the design and development of commercial applications as a project manager or DPM. Knowledge of database and real-time techniques would be an advantage.

Salaries are negotiable according to experience. Company benefits including bonus and relocation expenses. Overseas opportunities also exist.

For an informal discussion please contact Jim Baker,

JAMES BAKER ASSOCIATES,
International Personnel Consultants,
16 Maddox Street, London W1.
Tel: 01-491 4478.

Goldsmith brings temporary relief from permanent boredom.

Higher earnings, freedom, variety, particularly variety. When you work on contract with John Goldsmith you know you're working with one of the biggest and we're bigger because we've got better contracts with more of the kind of Companies you'd like to work for.

Our Contract Staff Division is headed by David Garnsey and he and his team of consultants make a point of getting to know the people that work for us and keeping in regular contact. Amongst our current requirements are the following contracts.

U.K.

Programming Team Leader. An in-depth knowledge of IBM PL1 & some CICS, required to lead a team of three programmers for a project duration of four months.

Systems Designer. A solid background in VMEB required by our client in Central London. This contract will initially be for three months.

Programming Team Leader. IBM Assembler (DOS) experience, required to lead a programming team within a large commercial environment.

Programmers. Interesting project for two programmers with DEC Assembler experience on an RT11 operating system, to work on a Stock Control Application.

Systems Analyst. With good Production Control experience, preferably IBM System 3, knowledge of MAAPICS would be advantageous.

Analyst Programmer. DEC BASIC + 11 experience required by City based Client for 6 month contract.

Working for John Goldsmith you get all the benefits and security of a good permanent job plus permanent health insurance, advice on taxation and company formation, holiday pay, subsidised medical insurance and - of course - prompt payment.

Maybe you are on contract, or between contracts, now. Or perhaps you've always wanted to try contract work, but have somehow never got round to it. Let us tell you in detail of the advantages of working on contract. Now is the time to act. Call David Garnsey or Ray Thomson on 01-828 5356.

in the Mathematics Department to maintain and supervise use of computer equipment and develop software for micro-computer system. Knowledge of basic and assembly language programming essential. Required for 1st September, 1979, or as soon as possible thereafter. Salary on scale £3,747 x 5 increments to £4,233 per annum inclusive of London Allowance. Write for further particulars to the Personnel Officer to whom applications should be submitted by 27th July, 1979.

Lothian Health Board

SENIOR SCIENTIFIC OFFICER

Applications are invited for the post of Senior Scientific Officer based in the Respiratory Laboratory, City Hospital, with some duties at the Pulmonary Function Laboratory, Royal Infirmary of Edinburgh and the Pulmonary Function Laboratory, Western General Hospital. The post would be of interest to suitably qualified applicants with special experience in on-line real time computing applications in medicine or respiratory physiology. Whitley Council conditions of service apply. The Laboratory may be visited by appointment with Dr. G. J. R. McHardy, telephone 031-447 1001 Ext. 394.

Further particulars on request. Applications, which should be typewritten, giving particulars of age, qualifications and previous experience, together with the names, addresses and telephone numbers of three referees should be lodged with the Secretary, 11 Drumshough Gardens, Edinburgh EH3 7QJ, by 27th July, 1979.

COMPUTER SUPERVISOR SYSTEMS ANALYST

We are Towler Hydraulics one of the world leaders in the manufacture of hydraulic equipment and a subsidiary of the Thorn Group of Companies.

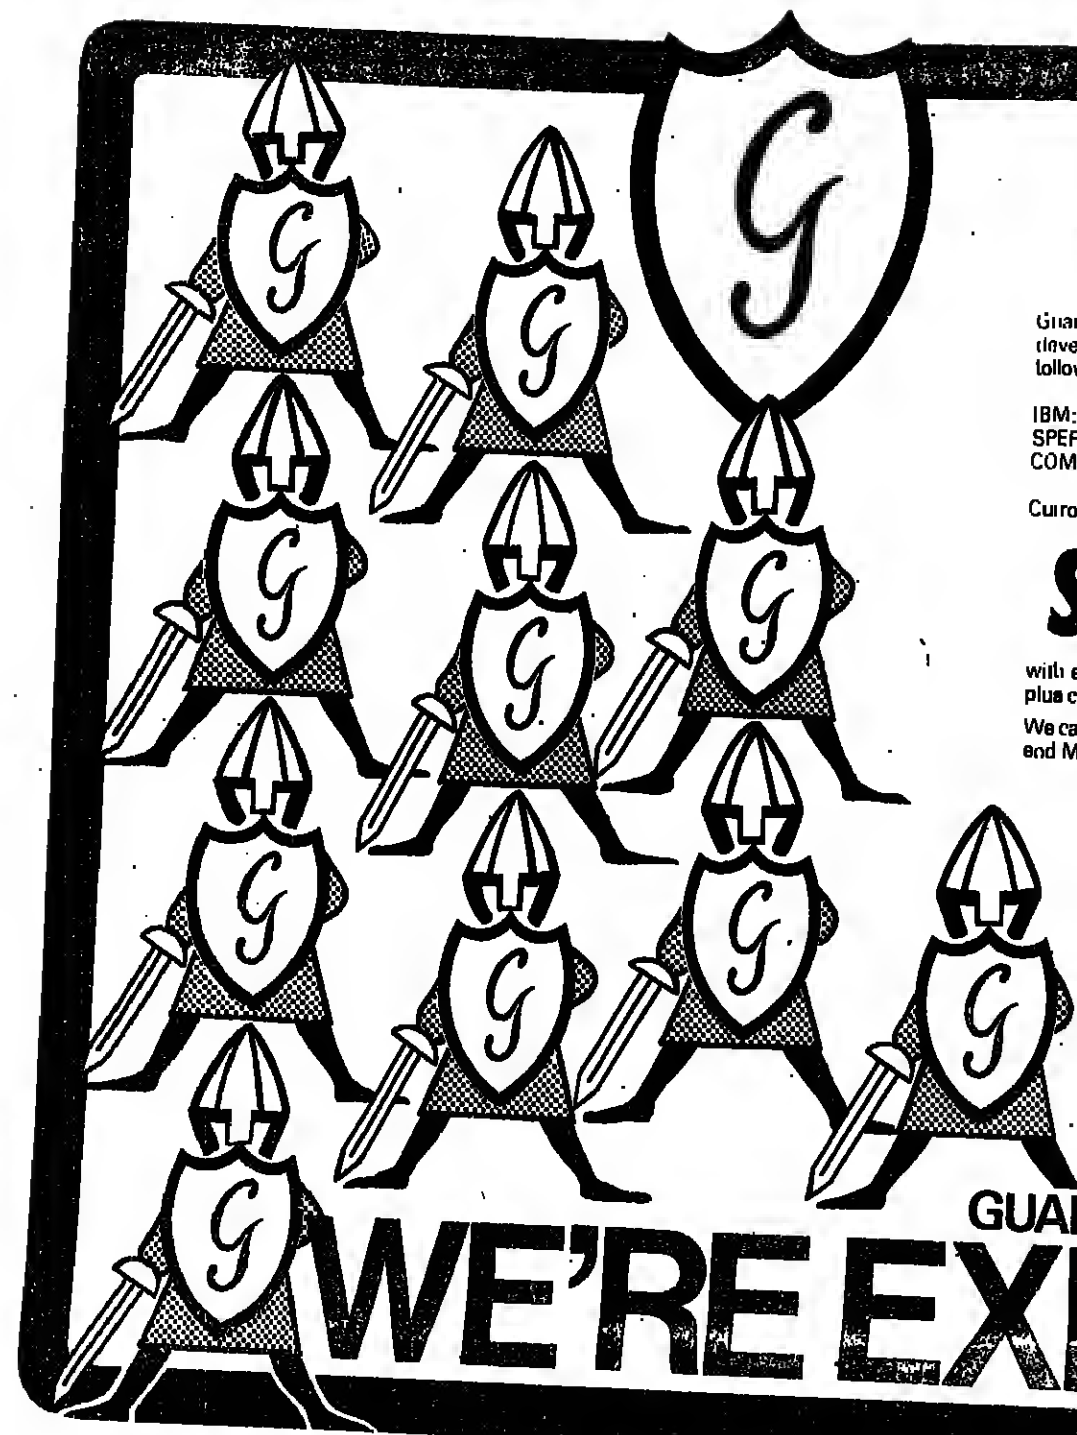

Our continuing search for improvement and efficiency in both home and overseas markets has necessitated the setting up of a computer department based on an IBM 31/15. Your task will be to head up the department and direct the staff of Analysts, Programmers and Operators. Major objectives include the introduction and improvement of systems, supervising programming for new applications, liaising with sales management, IBM and Thorn Group computer management and making recommendations on all hardware and software for future developments.

The job has wide ranging responsibilities and calls for you to be not only a highly experienced Analyst but also a capable manager.

The rewards offered include an attractive negotiable salary and a comprehensive big company benefits package which includes full relocation expenses as necessary.

To find out more write with full background details to Peter Sutcliffe, Personnel Manager, Towler Hydraulics Ltd, Oaklands Road, Rodley, Leeds.

TOWLER

**YES WE ARE EXPANDING
AND WE NEED YOUR HELP!**

GUARDIAN COMPUTER SERVICES LTD

WE'RE EXPANDING!!

PROJECT LEADER

Surrey

to £7500 + Car

A unique opportunity with a long established bureau/software house has arisen due to expansion. The company seek a programmer with at least five years' in depth experience of System 10 and its software to assume the position of Project Leader.

The ideal applicant will be expected to contribute their experience to projects being designed and developed on the System 10. You will also be expected to write programs if necessary, and advise others about programming. The company offer an excellent salary with the added advantage of a company car.

Reference HK28/1

BASIC+ / BASIC+2 PROGRAMMERS

Central London

to c£8000

A small but rapidly expanding Software House are currently seeking programmers with a minimum of 18 months' BASIC + or 12 months' BASIC + 2.

The company have PDP 11/34 in House and all major developments utilise the hardware. A wide range of applications are currently being designed, mainly in the commercial area.

They offer a very good career path moving if so desired into Analysis or Systems programming at an early stage.

The company offer an excellent salary plus all the fringe benefits you would expect from a dynamic and growing company.

Reference HK28/3

COMMERCIAL ANALYST

Central London

to c£8500

One of the leading Systems Houses in London currently require a Commercial Analyst with the minimum of 2 years' Analytical experience.

Most of the work undertaken by this company is on Mini's, so some knowledge of Mini's is desirable but not essential.

The ideal applicant would have already designed one major system from feasibility to implementation in a commercial area.

The company offer an excellent salary and the career path is naturally self generated.

01-439 7871

Reference HK28/5

BURROUGHS COBOL PROGRAMMERS

City

c£6,500 + 3% Mortgage

A merchant bank operating a large Burroughs installation including a mainframe and several minis is seeking several cobol programmers with good experience to develop into analysis work.

You will be of interest if you have eighteen months or more COBOL experience and are self motivated without the need for close supervision.

The company offers an excellent salary together with very good fringe benefits including a superb staff restaurant, L.V.s, Christmas bonus, etc.

Reference BP28/2

JUNIOR SYSTEMS ANALYST

City

c£6,500 + Mortgage

A major financial organisation operating an ICL 1900 installation which will be updated to an ICL 2960 by the end of the year, is seeking a junior Systems Analyst who is looking to expand on their current experience.

The minimum requirement is 18 months' systems experience gained on any hardware. A programming background would be useful although not essential.

The company offers a very good starting salary together with extremely good fringe benefits including a 4% MORTGAGE, BONUS, FREE LUNCH, season ticket loans, non-contributory pension etc.

Reference BP28/4

PL1 OR ASSEMBLER PROGRAMMERS

N. London

to c£7000

A large manufacturing COMPANY OPERATING AN IBM 370/138 requires a number of programmers to expand their Data Processing department, which is undergoing a major development scheme.

The minimum requirement is twelve months' experience, although the vacancies cover a range of positions and expertise.

The company offers a very good starting salary together with the usual fringe benefits one would expect of an organisation of this size.

01-439 7871

Reference BP28/6

JBA**Prestel/Viewdata Specialists**

Germany

from £20,000

Immediate vacancies exist for consultants who have considerable experience of information transmission systems, such as Prestel, Viewdata, etc. Data communications expertise and database knowledge is vital to the positions. A user contact background is desirable.

Our client is one of the largest consultancy organisations in the world with over 2,000 employees. On this solid foundation, the company offer real up-market remuneration packages and excellent relocation assistance. Further, the prospects of continued work of projects at very active levels in a worldwide market place is virtually second to none.

Contact: Mike Cronmer

Data Base Consultants

London based

neg. to £12,000

Applications are invited from Senior Data Base Specialists with a wide computing and business background to join a leading consultancy. Candidates should have experience of special analysis and design methods appropriate to the data base approach, have worked with at least one of the proprietary systems and be able to compare the different types of solutions available. Appointees will be required to work on a variety of client projects, ranging from advising on feasibility through to the detailed design and implementation of specific applications. The ability to work in a sophisticated environment, coupled with the drive, personality and technical expertise to communicate on the same level as senior managers is of paramount importance.

Contact: Margaret Stevens

Systems Programmers

Munich

DM 65,000 - 90,000 + benefits

Permanent positions are available with one of Germany's leading hardware manufacturers, for experienced IBM Systems Programmers who possess a minimum of 3 years' experience. DMS/VS, CICS, POWER/VS (or any other type of spooler) expertise is of most interest, although OS or MVS could also be of considerable value. All successful candidates will receive full relocation expenses, including agents fees, an initial family separation allowance and a minimum of 6 weeks holiday per year (plus all statutory holidays). German lessons will be provided. Contact: Andy Wright

For further information on any of the above vacancies, please contact the appropriate consultant. If your qualifications do not match the above positions but you are seeking other opportunities please contact us anyway.

JAMES BAKER ASSOCIATES, International Personnel Consultants,
16 Maddox Street, London W.1. Tel: 01-491 4478

Software Specialists

Home Counties

up to £14,000 + bonus

A major software house, with an impressive growth record, is continuing to expand and currently has vacancies for Programmers and Designers to work on the development of middleware associated with established operating systems.

Candidates should have at least 3 years' experience working on software such as OS, DOS, VME, 4/K, communications or networks. A background of implementing large mainframe systems, perhaps with a manufacturer would be an advantage.

Excellent salaries, relocation assistance and profit sharing scheme.

Contact: Jim Baker

Technical Analyst

Bracknell

neg. £7,000 - £8,000

This is an outstanding opportunity to join a successful British Air Freight Forwarding Company, to help consolidate and expand the operation of its relatively small d.p. function, both here and overseas. The company runs a worldwide network of minis, so although specific hardware experience is not required, candidates must have a thorough understanding of the concepts and possibilities of network processing. A sound knowledge of accounting/financial applications is, however, essential and must be combined with the ability to work at a detailed technical level.

Company benefits include an excellent pension scheme plus medical and life insurance - generous relocation expenses can also be made available. Two salary reviews per year can be expected.

Contact: Andy Wright

Programmers & Analysts

South of England

up to £6,000 + mortgage subsidy + benefits

One of the most prestigious insurance services companies in the UK with an impressive 40% growth factor last year, are recruiting additional staff for development work. Many systems are under way including installation of a DMS 2 database and a large real-time terminal network. Completion of these projects opens the way for a considerable number of additional systems thus ensuring creative work for the future.

Programmers must have at least 18 months COBOL experience in a batch or real-time environment. Analysts should have real-time commercial or accounting applications experience. First class location, outstanding employment package and a realistic career growth. Call for more details. Contact: Mike Cronmer

A chance to combine your problem-solving skills and technical expertise

with CTL, one of Britain's largest independent business computer manufacturers, responsible for the successful 8000 Series Systems. We are growing fast and have a number of opportunities on the support side of our Customer Services Division:

PRODUCT SPECIALIST - HARDWARE

up to £7K + car allowance*

to become our Technical Specialist on current products, provide cost effective servicing policies and liaise closely with the Marketing and Design divisions on the development of new products.

Candidates, HNC or degree level, should ideally have up to 5 years' hardware products experience, including peripheral and support in a service/design environment. Knowledge of programming, microprocessing and appreciation of systems software is essential.

SUPPORT ENGINEER - SOFTWARE

up to £6K + car allowance*

to act in a Project Manager role for systems implementation, and then to monitor and advise on the use of the operating systems and applications software. There will be considerable technical contact both with customers and our own engineers.

Candidates, HND or degree level, will have a minimum of 2 years' experience in a computer or associated industry in the implementation and application of software systems.

JUNIOR SOFTWARE SUPPORT ENGINEER £4.5K - £5.5K + car allowance*

to be responsible for activities relating to the provision of systems support to the customer base and our field engineering staff, including involvement with product development, performance and testing exercises and specific monitoring of customer situations on site.

This career opportunity would ideally suit an HND student or someone with at least 1 year's experience in support/design software environment or computer operations.

All posts, based at Hemel Hempstead, are open to men and women, and offer a real opportunity to join a fast-growing British computer company developing mini-computer systems in software and hardware.

Salaries are negotiable according to experience and will also include a car allowance of £950 p.a. Excellent company benefits and career prospects.

Please write, or telephone, for further details/application form to Jim Parle, Personnel Officer, Computer Technology Ltd., Eaton Road, Hemel Hempstead, Herts. HP2 7EQ. Tel: (0442) 3272.

COMPUTER WEEKLY, July 12, 1979

WANG

Join the superstars

... It's pure innovation that has put Wang into the superstar ratings, and at the forefront of computer sales in the medium, mini and word processing markets. Although in the superstar ratings, Wang have their feet firmly on the ground, combining sound business acumen with a simple yet sophisticated product range designed with today's needs in mind and based on 'state of the art' equipment. They have gained their success not only by having very competitive products; keenly priced and well supported, but by gathering a well motivated, well rewarded team of professionals and encouraging original thought and creativity. Over the past year Wang has grown considerably in size, due primarily to their marketing success which necessitates the need to recruit experienced professionals ... PUT YOURSELF AMONGST THE SUPERSTARS.

SALES EXECUTIVES: LONDON/HOME COUNTIES

NATIONAL ACCOUNT EXECUTIVE On quota c£20K + car
OEM SALES EXECUTIVE On quota c£18K + car
SALES EXECUTIVES On quota c£17K + car

Reorganisation in the marketing and sales force has identified a need to recruit key personnel, where experience, proven success and commitment will be well rewarded by exceptionally high earnings. These positions will require knowledge and experience of selling mini computer and/or word processing systems, and where applicants can demonstrate the ability to sell with a proven track record.

The National Account and OEM Sales Executive positions will require applicants with the appropriate skills in the respective areas. In both instances applicants should have previously negotiated with Chief Executives and senior management and ideally be used to UK responsibility in the assigned areas.

Contact: Cathy Tracey on: 021-236 3781 (24 hour answering service).

TELECOMMUNICATIONS SPECIALIST RICHMOND BASED

c£10,000 + car

A key and vital position within the I/K support group is that of Telecommunications Specialist. It will require you to have detailed understanding of IBM systems software and telecommunications - which could include 3270 protocol, TP monitors, SDLC and 'ISO. Your function will be providing advice on the communications associated with the 2200, VS and word processing range of products. You should have an ASSEMBLER level language capability coupled with extensive communications and software experience.

Contact: James Plummer on: 01-935 0671 (24 hour answering service).

APPLICATIONS ANALYST RICHMOND BASED

c£8,000 + car

As a member of the UK systems support group your primary responsibility will be that of evaluating application packages and liaising between third party software vendors and the Wang customer base. Basic job functions will include technical appraisal, support, software training and the distribution of information to the marketing team.

This is a key national role within Wang and will require you to have extensive business experience and an in-depth knowledge of application software, ideally gained in an IBM environment. The successful applicant would have leadership skills and be fluent in COBOL.

Contact: James Plummer on: 01-935 0671 (24 hour answering service).

FIELD SERVICE ENGINEERS c£5,500 + car + overtime BASED NW1

We have been asked to identify experienced Field Service Engineers or candidates who have previous experience in the communications industry and a preparedness to undertake comprehensive training. You will be the responsibility to support either the 2200 VS range of equipment or the word processing systems, where you will have a minimum of six months experience of mainframe, mini or word processing equipment maintenance and knowledge of the associated peripheral devices to board level repair.

In both instances you should be capable of logical thought, be self motivated and prepared to take responsibility for the service and support at a client base in a geographical zone. Your responsibility will span installation, fault diagnosis and repair-replace to component level.

Contact: Valerie Hall on: 01-935 0671 (24 hour answering service).

SUPPORT ANALYST BASED NW1

TO £8,000 + car

Working from a branch office and in the sales environment you will be responsible for pre and post-sales support on the 2200 VS equipment range. Your activities will span technical proposal submission, negotiations, demonstration, project development and team control to the full implementation of the computer systems.

The successful applicant will have a sound knowledge of IBM OS/VS software, COBOL and/or ASSEMBLER languages combined with a sales empathy. A distinct advantage would be that of a previous background with a manufacturer or service organisation.

Contact: James Plummer on: 01-935 0671 (24 hour answering service).

Cleveland Area Health Authority Middlesbrough General Hospital Electronic and Bio-Medical Equipment Technician

A SENIOR ELECTRONIC TECHNICIAN is required to work with and be part of an existing team of technicians involved in the maintenance of a wide range of electronic and bio-medical equipment in the District.

The successful candidate, who will be responsible to the Chief Electronics Technician, will need to have been engaged on the more advanced work of the electronic workshop with experience of electronics in the computer field being a decided advantage.

Applicants must possess a minimum qualification of O.N.C., H.N.C. or H.N.D. or equivalent in Electrical/Electronic Engineering.

This appointment involves the ideal opportunity for a person with high skill and ability in electronics maintenance to expand their knowledge into the interesting field of bio-medical equipment which includes brain and whole body scanning equipment.

Working conditions for B.T.B. Staff apply. Hours of duty normally 38 pm week. Facilities for further education and training available.

Salary Scale: £3,744 to £1,788 p.a. (Medical Physics Technician III)

Application form from District Administrator, District Offices, Pools Hospital, Nunthorpe, Middlesbrough, to be returned by 10th August, 1979.

South Tees Health District

Forward Trust Limited, a leading finance house and member of the Midland Bank Group, wish to supplement their management services function by the appointment of experienced computer personnel.

Business Analysts

£6,500 - £8,500 p.a.

Candidates will require several years commercial systems experience. They will lead and control teams investigating business problems, specifying solutions in non-technical terms.

Analytical and evaluative skills, together with a capacity for creative thinking, are essential.

Senior Systems Analysts

£5,500 - £7,300 p.a.

Candidates will have a minimum of 3 years' systems analysis and design experience with proven involvement in all aspects of analysis work. A programming background will be preferred and potential for career progression to Business Analysts essential.

Forward Trust are currently reviewing the total company approach to computing, leading to a planned installation of a network of terminals by the end of 1980. This network will be supported from the head office at Birmingham and in time will lead to re-design of the existing batch systems on to a company database. Experience in On-Line networks, telecommunications and database techniques will, therefore, be an advantage in applying for the above positions.

Commencing salaries for the above positions are negotiable, according to experience. Established staff are eligible to apply for staff loans at preferential rates of interest and there is a non-contributory pension scheme plus the security of being associated with a major banking group.

Candidates, male/female, should telephone or write for an application form to:-

Forward Trust Limited
12 Colthorpe Road, Edgbaston, Birmingham B15 1DZ
Tel: 021-454 6141 ext. 247.

A subsidiary of Midland Bank Limited.

INFLUENCE THE DEVELOPMENT OF COMPUTING IN THE NORTH-WEST THAMES REGIONAL HEALTH AUTHORITY

SYSTEMS DEVELOPMENT OFFICER

SALARY SCALE £7,308-£8,777 p.a. (Pay award pending) (including London Weighting)

A vacancy exists for a Systems Development Officer, accountable to the Regional Computing Services Officer for the development of systems for the Regional Health Authority and Area Health Authorities within the Region, which covers Bedfordshire, Hertfordshire and Districts in North and West London. We are currently reviewing our computing policy and the person appointed will have an influence on the future strategy for computing development. Sound managerial experience is essential as is the ability to liaise with staff in all disciplines and at all levels.

A large ICL 1904S is installed in a new building in North London (near Farnham Road, Farnham).

Computer People

Recruiting for Clients in the UK and Overseas
VLI House 68-69 St Martin's Lane London WC2N 4JS (01-250 2441)

What company is prepared to offer £24,000?

Why are they looking for a
TECHNICAL SUPPORT MANAGER DESIGNATE?

Why will they fly you to KUWAIT before you decide?

A leading Gulf trading company based in Kuwait is the exclusive distributor for a major mini manufacturer. They offer the security of working for a large company but the D.P. division has all the flexibility of a small expanding unit. In line with this expansion they wish to recruit a software specialist capable of becoming their Technical Support Manager in the future.

A software background with a mini manufacturer would be ideal, although large mainframe and teleprocessing knowledge would be entirely acceptable. You will be working in a sales support environment and it is essential that you are capable of dealing with customers and discussing with them their software problems. There will be considerable technical content to this position and you will be expected to handle all new software releases. Initial training will take place at the manufacturer's U.K. premises and will involve both formal lectures and practical experience in one of their departments.

Kuwait is a very sophisticated Middle Eastern country where English is widely spoken. There is tremendous emphasis on outdoor leisure activities and community life, hence we would prefer married candidates. Salary will be tax free and there will be provisions made for accommodation, trips home, education of children etc, but these will be negotiable dependant on the individual requirements of the person concerned. Our client would like to make sure that the association is a long and happy one and they are therefore prepared to pay for you to make a trip out to Kuwait before you make a final decision. Please contact Caroline Bagley immediately for further details.

PROJECT PROGRAMMER

A variety of interesting projects are available for a motivated and experienced project programmer. The project involves the development of a new system for the control of a large industrial plant. The project is a major part of a research programme and offers a wide range of opportunities for professional development. The project is a major part of a research programme and offers a wide range of opportunities for professional development.

If you're on the way up in Systems Development, we'd like to meet you half-way

As a young County Council we're deeply interested in computers and what they can do for us.

That's why we maintain a 45-strong Systems Development Section within the Computer Division of the County Treasurer's Department. The Section is involved with a wide range of work for the Council (including Police, Health, District Councils and the Area Health Authority). Equipment includes an IBM 3081 (MVS) under OS/VS1, which also supports CMC, Realtime and 'Sovereign' and Prime 300/350 minis. Programming skills include 'Quota' and 'Easitree'.

Currently we're looking for more men or women to join the team of ambitious people who are on the way up in software development. And we'd like to meet them halfway, before natural flexibility of mind becomes hindered by routine.

Right now we need: DEVELOPMENT STAFF
£3732 - £6069 (pay award pending from 1 July 1979)

These posts carry the titles 'Senior Programmer' or 'Systems Analyst' (eg1 from £3732 to £4245 to £4774 to £5232 to £5727) in accordance with the Council's pay award. Salary on appointment will be dependant on experience.

You should have at least one year's experience of IBM equipment, plus a knowledge of PL/I or Assembler.

We are based in the attractive old town of Matlock, which is within easy reach of Bellingham, Derby and Sheffield. A scheme exists for payment of lodging and removal allowances to homeleaves.

For an application form, please write to the County Treasurer, PO Box 2, County Offices, Matlock, Derbyshire DE4 3AG. Alternatively, telephone PC Walsh on Matlock (0429) 3411, extension 7761.

Where can Systems Analysts get the most out of the system?

Only in a company that's a growing faster than its competitors.

Only in a company with a 'software first' design philosophy.

Only in a company far-sighted enough to realise that compatibility is the key to the future.

Only at Prime.

Prime Computer designs, manufactures and markets a broad range of powerful, cost effective computer systems with compatible architecture and using the same software. These systems have

established new price/performance standards for inter-active multi-user applications. Software developed on central sites can be distributed to run on smaller systems at remote sites. Moreover, by utilising our powerful network capability, distributed processing is a reality.

You will be working in field or central systems support teams. The field positions encompass all areas of pre-sales, installation and post-sales systems support, whereas the central system support positions are ones of greater specialisation.

You will have had several years' experience in the industry, be fluent in at least one major language and have a solid background in your discipline.

The rewards for working on your own initiative are high with Prime. So come looking for a competitive salary - all you have to do is prove you're worth it and we'll pay it. The benefits include a company car, BUPA, a pension scheme and a successful stock purchase plan.

For full details, please contact Patrick de Peyer, Marketing Support Manager, on 01-572 8241 or send him your brief career details in utmost confidence to:

LEEDS	SALARY
Senior Analysts These are senior positions, offering a generally broad commercial background. Some experience of manufacturing and production control systems. Self starters only please. (Ref OR 1)	£7000
Systems Analysts A number of leading ICL users in the Leeds area have vacancies for experienced analysts. Industries and applications vary widely. Salary will reflect experience. (Ref OR 2)	£6250
Analyst Programmers Challenging environment offers first class training prospects together with every opportunity to widen experience. Some systems analysts also BASIC and ideally a knowledge of PDP11 hardware and software. (Ref OR 3)	£5500
Programmers Experienced COBOL programmers are required by a number of organisations. Particularly attractive vacancies in Leeds within ICL installations in the 2000. All levels of experience required. (Ref OR 4)	£6000
Programmers Very interesting vacancies for experienced programmers. Ideally knowledge of PDP11 hardware and OS, RSPS and RSX11. High level languages preferred and BASIC a particular advantage. (Ref OR 5)	£5500
WEST YORKSHIRE	
Systems Analysts Excellent opportunities in IBM installations. Applications cover finance, stock control, material handling and general administrative systems. Whatever your experience you should talk to us. (Ref OR 6)	£6500
Programmers COBOL programmers with from 1 years experience are needed throughout the area. Previous IBM experience useful particularly including knowledge of DFS and CICS. (Ref OR 7)	£4800
BRADFORD	
Programmers A major ICL installation in Bradford, looking for both programmers with 1 years experience in PL/I, COBOL and BASIC. Excellent prospects for training and career progression. (Ref OR 8)	£6000
Huddersfield	
Systems Analysts A well known company with an excellent track record wishes to recruit additional systems analysts. IBM background and manufacturing systems experience useful. (Ref OR 9)	£6250
MANCHESTER	
Senior Analysts There are outstanding opportunities for good systems analysts to really make their mark in a dynamic environment. Good systems and programming background and a record of commercial applications. (Ref OR 10)	£7250
Programmers Interesting vacancies for programmers at all levels of experience. Languages required are PL/I, COBOL, BASIC. Most installations and a number of others. (Ref OR 11)	£6000
NOTTINGHAM	
Analyst/Programmers If your field is more and more language BASIC - then this could be what you are looking for. PDP11 and RSX11 an advantage. (Ref OR 12)	£5500
GLASGOW	
Programmers Programmers required for interesting applications including minis. Languages should include COBOL and there is also scope for programmers with ASSEMBLY and BASIC. (Ref OR 13)	£5500
DUBLIN	
Analyst/Programmers Very good chance to work in a stimulating organisation using minis. BASIC is a requirement and some previous experience of analysis work an advantage. (Ref OR 14)	£5500

DATA RESOURCES AGENCY - FREEPOST - HARROGATE
NORTH YORKSHIRE - HG1 5BR - TELEPHONE HARROGATE 5099

Software Engineering Specialists

STRETCH

yourself on the Dorset Coast

£6½-8½k

Stretch yourself and advance your career with one of our systems design and software teams involved on major new contracts.

Current projects include circuit-switching and packet-switching, data communication schemes and wide-area urban traffic control systems.

You will be engaged on complex multi-processor, real-time software applications and utilise such minicomputers as the DEC PDP11.

The appointments call for a real-time systems design/programming background. A knowledge of Assembler, Coral 66 or similar would be a distinct advantage.

Not only will the work stretch your ability, it will also lead to rapid salary and career advancement if you can demonstrate the necessary qualities. There's a comprehensive relocation package to this attractive part of the Dorset coast.

Chief Software Engineer

Responsibility for total project management, system design and customer liaison.

Group and Project Leaders

for systems design, customer liaison and to lead programming teams.

Systems Designers/Programmers

to specify, code and test interesting real-time programmes.

FOR THE FACTS AND TO ARRANGE AN INFORMAL DISCUSSION RING (020 13) 5161 Ext. 2028. REVERSE CHARGES.

Alternatively, write with brief details including present salary, to J. G. Griffiths, Plessey Controls Limited, Sopers Lane, Poole, Dorset BH17 7ER.

MYRIAD PROGRAMMER SMALL TEAM ENVIRONMENT

N.W. LONDON (NEAR M1) £4750-£5500

Our client, one of the UK subsidiaries of a large American conglomerate, has recently installed an ICL 2903 and now require an experienced programmer to assist in the implementation of a complete range of new systems.

As with most successful organisations, extensive dependance is put on the speed and accuracy of information made available to support company policies and decisions.

The successful applicant, with at least EIGHTEEN MONTHS' COBOL programming experience gained in a commercial environment, will work closely in a small and friendly installation where being a member of a small team will give you the opportunity of gaining total system involvement and the possibility of gradually exercising your own analytical potential.

This is an excellent opportunity for a person to consolidate their programming skills in a professional environment and is supported by the offer of a realistic salary and attractive company benefits.

Professional DP Training Sales Consultant

London
Remuneration to £9,500 plus car

BIS Applied Systems Limited is a member of the Business Intelligence Services Group which employs over 200 staff in data processing and has a turnover approaching £7m. A leading DP consultancy, BIS Applied Systems is known throughout the UK and overseas for providing practical training to DP management, their staff and their users.

Responsible to the Manager of Training Sales, the consultant will sell and support the company's training services through direct contact with DP management and training staff. The role involves identifying training needs and developing career structured training programmes with client companies.

Sales experience, preferably within the DP services industry, together with good communication skills and a readiness to learn are all important requisites for a role with excellent prospects for wider responsibilities in a successful, growing company.

The importance of the post is reflected in a remuneration package including salary, car and company benefits scheme.

Please write or telephone for more details and a Personal History form to Stephen Helms or Derek Potts, Training Division, quoting reference G740, at the address below. Applications are invited from either man or woman.

BIS Applied Systems Limited
York House, 199 Westminster Bridge Road
London SE1 7UT
Telephone: 01-633 0866

BIS Applied Systems

SENIOR PROGRAMMER

We are an engineering company committed to a programme of forward planning and development. In preparation for the installation, in early 1980, of a new Univac 90/25 with 3 x 8416 disc drives and V.D.U.'s which will replace a Univac 9310 we wish to appoint a Senior Programmer with a minimum of three years' commercial programming experience in ASSEMBLER (Univac or IBM) and/or COBOL.

Familiarity with on-line programming techniques would be advantageous but is not essential.

If you're the type of person who enjoys improving and updating systems, capable of working without supervision you can expect to assume full responsibility for the development and maintenance of our computer systems very quickly.

Interested? Then write in confidence to our Personnel Director, or if you prefer, telephone our Personnel Department on Walsall 26581.

Barton Conduits Limited,
Old Birchills, Off Green Lane,
Walsall, West Midlands.

BARTON

EDINBURGH REGIONAL COMPUTING CENTRE COMPUTING OFFICERS

The Centre has two vacancies (one part-time) in its Advisory Service for Assistant Computing Officers or Computing Officers.

Currently the main computing services offered to users in Edinburgh University and the Research Council Institutes in Edinburgh Area are based on the Edinburgh Multi-access system which runs on both ICL 4.7S and ICL 2970 installations. An ICL 2980 (which also provides a VME/B but will change to EMAS in the coming year) in addition, IJF Access is offered to IBM OS/MT/MVS services at Newcastle and Cambridge, and to CDC 3800 facilities at Manchester.

The Advisory Service is a local point within the Centre where users can raise queries regarding use of those and other systems, and successful applicants will join the team of advisors (after initial training) as part of their duties. The following post will also involve a substantial assignment in one of a number of areas such as support in the Centre's use of external services, support to some of the Centre's own system software or consultancy in selected applications packages. The post involves a full range of work by negotiation will also involve a limited amount of other work, besides advising.

Applicants are invited from graduates with some computing experience other than use of those and other systems, to working on the Centre and relevance of this experience. Initial placement would be in the Assistant Computing Officer grade (L1 75-5500) or Computing Officer grade (L1 75-5500) or Computing Officer grade (L1 75-5500) or Computing Officer grade (L1 75-5500). The salary scale is £5,500-£7,000 p.a. (inclusive) for the first year. For an application form and further details contact (quoting reference 7015) The Secretary, University of Edinburgh, Old College, South Bridge, Edinburgh EH8 8YJ. If your completed application should be submitted by 31st July 1979.

LEEDS CITY COUNCIL DEPARTMENT OF ADMINISTRATION COMPUTER SERVICES DIVISION

The Council currently operates a large ICL 1904S with a variety of computer terminals (including minicomputers) and a wide range of computer applications running under the GEORGE 3 operating system. Consideration is being given to the replacement of the ICL 1904S and evaluation of alternative equipment is in hand. The following vacancies exist in the Development Branch:

SOFTWARE ANALYST PROGRAMMER

SD1/2 - £5232 to £6080 p.a. (inclusive)
(pay award pending)

Applicants should have at least three years' COBOL and/or PLAN programming experience on an ICL 1900 computer under GEORGE 3, and preferably knowledge of ICL utilities. Communications Manager Software and Operating System maintenance. Experience of programming staff supervision and training is also desirable.

SOFTWARE PROGRAMMER

T1/5 - up to £5073 p.a. (inclusive)
(pay award pending)

Applicants should have two years' experience of COBOL, PLAN, FIMA 2, GEORGE 3 and/or Communications Manager.

Applications in writing to: Personnel Officer, Department of Administration, Room 306, Civic Hall, Leeds LS1 1UR.

CLOSING DATE: 14 days after appearance of advert.

LEEDS

Police Headquarters, Lewes

SYSTEMS ANALYST

New venture... challenging opportunity

Salary in the area rising to £5,568 p.a. (pay award pending).

You will be working alongside police officers as part of a project team formed to investigate computer applications to support operations.

This is an unusual opportunity to come to the ground floor of an entirely new venture; you will be expected to make a full contribution in the field of statistical models and in the analysis and application of data to the systems.

Relocation scheme plus other usual benefits. Government benefits. In addition you will enjoy excellent staff restaurant facilities.

For further details and application form please contact Personnel Officer, Police Headquarters, Malling House, Lewes, Sussex. Tel. 5432, ext. 308.

SOUTH WEST UNIVERSITY
REGIONAL COMPUTER CENTRE
University of Exeter

ICL 2980

The Regional Centre is a leading 2980 site. We have large 2980 systems under VME/B and provide computer services to Universities in the South West over staff communications facilities. Following an initial period of applications are invited for the post of:

SHIFT SUPERVISOR

Applicants must have relevant experience in a large computer environment (2980) and experience in supervising staff. Important attributes are initiative, enthusiasm and professional approach to operating.

Salary (on basis of three shift allowance)

£4500-£5370 (initial award)

Application forms and further particulars (quoting ref. 158, 159) from Personnel Officer, University of Exeter, Devon, Exeter, BA2 9AT. Closing date 27.7.79.

MICRO-PROCESSOR SOFTWARE DESIGNERS

To £7000 + Relocation
FOR NCR'S IMPORTANT
AND GROWING
SOFTWARE DEVELOPMENT
FACILITY IN DUNDEE

Consider the following:

1. NCR is the world's No. 2 supplier of computers and related systems.
2. NCR was one of the earliest users of Micro-Processor technology and is, therefore, one of the most experienced.
3. A new multi-micro architecture for intelligent terminal products.
4. A well-planned rate of expansion.

—and all these with the social benefits that go with living on Tayside.

NCR Dundee is rapidly becoming established as an important centre of original software development for NCR worldwide. Current projects include a block-structured language compiler and control software for specialized self-service terminals. Others are planned, and there is a continuing dialogue between Dundee and other NCR development centres around the world.

There are several vacancies, all brought about by new product development. For graduates with up to 5 years' experience, salaries are very competitive (i.e. to £7000) and are currently under review. Conditions of employment generally are excellent and a generous relocation package is offered where appropriate.

If you feel that there might be something in all this for you, then give me, Tony Baker, a call on 01-499 4501, or write to me at the address below, quoting reference RW 28/1.

01-499 4501

MYRIAD SYSTEMS CO-ORDINATOR

NR. BRENT CROSS c £7500

An extremely challenging opportunity has arisen within our client's organisation for an experienced professional to co-ordinate the development of a major on-line application.

This is an ideal opportunity for a self-motivated and mature person to interpret the requirements of user departments and relate these in system design, specifications and programming.

The company are one of the leading manufacturers and suppliers of medical life support systems and are an extremely successful division of one of the largest public companies within the UK. They have recently ordered an IBM System 34, due for delivery in March, 1980, with the intention of utilising the IBM MAPICS packages to interface in the development of an on-line order processing system and management information reporting.

Ideally applicants should be able to offer a minimum three years' data processing experience where they have developed commercial/financial systems using RPGII and have progressed in systems analysis. It is envisaged that the successful candidate will assume project leading responsibilities and contribute in the initial planning stages of future systems.

Working in a very pleasant office environment, a full range of company benefits support this challenging position.

GREATER MANCHESTER COUNCIL
COUNTY ENGINEER'S DEPARTMENT

**COMPUTER
OPERATOR/PROGRAMMER**
£1821/£4832 p.a. inclusive

In place of the operation of a large PRIME 400 computer installation and to develop computer programs for the various applications areas within the department.

The installation consists of a 640K byte PRIME 400 Computer with three on-line disc drives, two magnetic tape units, line printer and bar code reader. Users have access to the computer via VDU's located in the design office.

Preference will be given to applicants possessing experience in both computer operations and FORTRAN programming, although training will be available for less experienced staff.

Applications by letter giving all relevant details including age, qualifications, experience and two references to the County Personnel Officer, County Hall, Manchester M60 3HP by 28th July if possible, please include a telephone number where you may be contacted.

WESTFIELD COLLEGE
(University of London)

CASE Studentship
with IMOS in
MICROPROCESSOR
DESIGN

Applications are invited from those who have received a degree in Computer Science or related subject. The successful applicant, who will be expected to register for a PhD, will divide his time between the University and the Bristol Laboratories of IMOS.

The research goals are not merely to design a microprocessor, but also to develop relevant simulation techniques and study the design-simulation cycle.

Applicants should write or phone Dr. Peter Dutton, Computer Science Department, Westfield College, Kidderminster Avenue, Hemel Hempstead, Herts. AL10 3AB (01-462 7141).

Deputy Supervisor -Software

Switzerland

An important international bank is urgently seeking a capable systems man for its newly-installed centralised computer system. Based in Switzerland, he will be deputy to the software Supervisor and be responsible for software systems in connection with the 370/148 VM centre, with VM370, DOS/VSE, CICS, RJE, Power and VTAM.

The right man will have had at least four years' systems programming experience, one year of which should have been in the capacity of senior or deputy. A good knowledge of on-line systems, JCL and work control procedures, as well as an excellent insight into software applications is essential. With English as his mother tongue, he should also have a working knowledge of German. This is a responsible position with career prospects, and salary and other conditions are excellent. Please write, in strict confidence sending a Curriculum Vitae to:

ANALYSTS
£6,000-£8,000
London W.1

Looking for an above-average career opportunity?

Check whether these features coincide with your objectives:

- Use of sophisticated techniques — including Database, Communications and COM.
- Latest hardware — both mainframe and minis.
- Plenty of new development work, with close involvement with users.
- Good working conditions, friendly atmosphere, flexible hours.
- Substantial training budget.
- Good prospects of advancement to management posts.

Due to an expanding volume of work, our clients, a major bureau installation, have asked us to assist them to recruit Systems Analysts at several levels, ranging from Junior Analysts (say with two or three years in DP, including some analysis), to Senior Analysts, with appropriately heavier experience and team leadership capability. There are no specific applications or hardware requirements; the need is for presentable, well-educated DP professionals.

To learn more about these first-class career openings, ring us in confidence, quoting ref. 672CW or leave a message on our answering machine and we'll contact you.

RESEARCH ASSISTANT

Applications are invited from recent graduates or students graduating in 1979 for the post of Research Assistant to work in the field of parallel processing with microprocessors. Prospective candidates should hold or expect to obtain a good honours degree in any of the following disciplines: Electronics, Control Engineering, Computer Engineering or Mathematics.

Candidates will be expected to register for a higher degree, M.Phil./Ph.D. Telephone enquiries can be made to K. M. Abbott, Tel. 0191 761911, Ext. 18. Salary for this post, which is tenable for two years from 1st September, 1979, with a possible extension up to three years, is £2,778 to £3,064 p.a. annum (under review). An application form may be obtained from the Personnel Officer, Sunderland Polytechnic, Chester Road, Sunderland, SR1 3SD, and should be returned as soon as possible.

So you know all about Systems Software How about Computer Systems to Design Systems Software?

The brief for this job is to assist in the design and implementation of a methodology for the controlled evolution and maintenance of systems software.

The hardware centres on a major family of mainframe computers together with new systems currently under development. The location—Southern Germany.

We are looking for:-

Systems Designers

With at least three years relevant experience to work on the development of technical procedures for a system of computer aided design to be used on operating systems software.

Senior Programmers

With several years' experience of programming as part of a major project team. The job will be of particular interest to programmers with an interest in the development of systems software.

The main qualifications we require are experience and innovative ability.

The company—an international organisation based in Germany with a first class record in the business world and a reputation for using the skills and talents of their people with imagination and with commonsense.

Background—the people we require will have extensive experience of at least two of these languages—PLI, Cobol, Assembler, SPL.

To make a contribution to this project you will need a clear understanding of how systems software is developed at present and more to the point, how it should be developed in the future.

In return we can give you the satisfaction of working on the project which will produce the industry standard for systems software development in the '80's.

Extremely attractive salaries are being offered for these positions together with the usual benefits associated with a large international organisation.

The Country—Living in southern Germany can be a reward in itself. The cities offer an enjoyable way of life and the countryside is beautiful and unspoilt.

If you are interested in applying for a position working on this project please write in the first instance giving details of career to date and qualifications to:-

Altmann & Partner GmbH

at either:-
21, Mount Ephraim Rd., or Weissenportz,
Tunbridge Wells, Kent. 5203 Much, West Germany

Yorkshire Regional Health Authority

Computer Operator

£3,452-£4,121 (Review pending) plus shift allowance of 10% (Candidates from outside the Health Service will commence at the minimum of the scale)

A vacancy exists for an experienced Computer Operator to join a team of operators working a two shift system covering five days per week.

The Authority operates an ICL 1904A with 128K core, 8 x 10560, 8 x 16000 rpm tape drives, 2 line printers, card reader, paper tape reader and communications.

Candidates should have experience of operating in a medium to large ICL installation using GEORGE 3.

Application forms and job description may be obtained from the Regional Personnel Officer, Yorkshire Regional Health Authority, Park Parade, Harrogate, North Yorkshire. Please quote Ref. No. 41.

Closing date 27 July 1979.

UNIVERSITY OF GLASGOW COMPUTING SERVICE

PROGRAMMING ADVISOR

Applications are invited from candidates holding a university honours degree or equivalent for an appointment as Programming Advisor on Grade 1A or 1B of the scale for Other Related academic staff, for which the salary scale as at 1st October 1978 will range from £1333-£7521 and from £727-£3892. The post is primarily concerned with the provision of advisory, consultancy and related information services associated with a large ICL 2987 computer which runs both batch-processing and interactive (MAC) work under the VME/8 operating system. A knowledge of at least two high level programming languages, together with experience of applications programming is required.

Further particulars may be obtained from the Secretary of the University Computing Service, University of Glasgow, Glasgow, G12 8QQ, with whom applications (in envelope, giving the name and address of three referees, should be lodged on or before 31st July 1979).

In 1979 please quote Ref No. 44779.

Are offering exciting opportunities in London and Home Counties to ambitious Service Engineers.
If you need—
Basic salary c. £6,000, 24-hour car. Very comprehensive product training, overtime standby and bonus payments, ANO Progressive career opportunities call today—Consultants, Ref. EK2058.

AB EXECUTIVE (KINGSTON) LTD. 01-549 6442

ARE YOU AN EXPERIENCED SPECIFIER WHO WOULD LIKE TO DEVELOP A CAREER IN MARKET RESEARCH?

If so, we would like to hear from you. We are RBL, the U.K. arm of Research International, the World's largest full service market research organisation. Our Business & Industrial Group, which is mainly involved in international research, needs an extra person with D.P. skills who would like the opportunity to develop, with training, into the more general executive area of Market Research.

The successful candidate will have not less than 2 years' experience of Market Research analysis specification preferably, but not essentially, using the Quantum Package and familiarity with keyboard terminals and an on-line system are essential. (If you are an experienced Specifier who wishes to move into main-stream market research career development, this is an ideal opportunity.)

Candidates are unlikely to be earning less than £5000 p.a. currently.

Please contact by phone or letter, Philip Bernard (Director) or Don Severly (Group Head of Business and Industrial Research) at RBL.

Don't underestimate your Dec 10 experience. Why?

Because Marconi Avionics—innovators extraordinary—are pioneering a brand new application of DEC 10. It involves a major long-term project which entails the real-time simulation of the world. It's a project worthy of any ambitious and technically-dedicated Analyst or Programmer; and the opportunities for career development and diversification are unusual to say the least.

Don't underestimate your DEC 10 experience. Initial salaries are excellent, and will reflect the importance of the project in hand.

For full details, please contact Chris Hill, Marconi Avionics Limited, Elstree Way, Borehamwood, Herts. WD6 1RX or telephone him on 01-953 2030 ext. 3449 or call 01-207 3455 any time (day or night) and we'll send you more information.

MARCONI AVIONICS
A GEC-Marconi Electronics Company

EXPERIENCED SENIOR COMPUTER OPERATOR

with some knowledge of communications hardware to be responsible as Communications Supervisor for monitoring the functioning of the Communications equipment and lines associated with the Computer Centre's computers. Salary scale £3078-£3774 p.a.

Application form from Assistant Secretary, Personnel Office, University of Birmingham, P.O. Box 363, Birmingham B15 2TT. Ref. 880/G/192

EUROPE CALLING

We have a whole list of excellent positions currently available throughout mainland Europe. call No. below (reverse charge for full details)

OS-VSI Systems Programmer (long contracts £400 p.a.)
Service Engineers for Minis (Permanent job for good) or
Oak specialists (long contracts, excellent rates)

Phone Welle (European) Data Services Ltd. on Holland 040-441 821 or write to: Penelope Street, 183 Eindhoven, Netherlands

CALMA is an American-based company specialising in producing computer systems for design applications. Their applications cover the area of integrated circuits, printed circuit boards, mapping and mechanical design. We are growing very rapidly and will shortly open a new European customer support facility located in Kingston, Surrey. To support this expansion we require the following additional staff.

1. APPLICATIONS ENGINEERS

Candidates should possess experience in either mechanical design or printed circuit board layout, together with some software knowledge. Familiarity with Data General RDOS would be an advantage.

2. FIELD SERVICE ENGINEERS

Locations, Edinburgh/Glasgow and Manchester. Applicants should possess several years' experience of computer system field maintenance and be capable of working on own initiative. Experience of plotting equipment and/or mini-computers would be an advantage.

3. HARDWARE TECHNICAL SUPPORT

Applicants should possess several years' experience as computer field service engineers. Experience of mini-computers or plotters would be particularly relevant.

4. HARDWARE REPAIR SHOP TECHNICIANS

Although previous computer experience would be desirable, applicants possessing a sound practical and theoretical grasp of electronics would be acceptable, as full training will be provided.

COMMUNICATIONS NETWORK MANAGER

This position is likely to prove attractive to an experienced computer field service engineer who has specialised in communications and now feels able to manage and support a small team responsible for a large, complex comms network, linking several large computer centres and associated terminal equipment.

Conditions of employment will reflect the high grade of people being sought and will be very competitive.

Please write in first instance to:

CALMA COMPANY
10 Barley Mow Passage, Chiswick
London W4 4PH
or phone 01-994 6477

PROGRAMMERS GOT THE HUMP?

An easy way of getting over the hump is by coming to work for a friendly, progressive company, where you'll be able to tackle really interesting and challenging projects, and also have the opportunity to travel abroad.

If your promised career progression so far has proved to be little more than a mirage, we can change all that—as a multinational organisation your career options are outstanding, and your experience will certainly benefit from our increasing data communications commitment.

We are active in Mini Computers, Micro Computers, Assembler Programming, Real Time Systems, Message Switching and Data Communications Systems. Programming development is conducted in Assembler and high level languages utilising our powerful IBM installation, and target hardware testing is an essential element of systems' implementation.

We're conveniently based on the outskirts of London, beside Cockfosters Underground Station. We'll pay salaries up to £8,000 and we'll relocate you where necessary.

Interested? Then telephone Jim Reynolds (Chief Programmer) on ext. 391 for more information. Alternatively, for an application form, write or telephone Frances Mason (Programmer Recruitment) at ITT Business Systems, Diversary House, Cockfosters Road, Cockfosters, Barnet, Herts. Telephone 01-440 4141 ext. 349.

ITT Business Systems

COMPUTER SUPPLIES

Sales Executives

One of the leading companies in the supplies field, we are looking for representatives between 25 and 35 to fill two attractive positions.

1. West End, N.W. London, Bucks, Berks.
2. S.W. London, S.E. London, Surrey, Hants.

You will be selling a full range of products to computer users including magnetic media, filing and storage systems.

You will earn a good salary (£7000+ p.a.) and other benefits include a company car and four weeks holiday.

While with details of previous experience to: I.A. Gilbert Esq. Willis Computer Supplies Ltd., P.O. Box 10, Southmill Road, Bishops Cleeve, Herts. CM23 3DN.

WILLIS

A change is as good as a rest.

With a new career, you could feel a new person. And be better off than you thought possible. Call Dennis Clay, to find out how on 01-680 1955.

PROGRAMMER

Salary £4200-£6,200 p.a. (under review)

The Central Electricity Generating Board invites applications for the post of Computer Programmer in the Station Control Room of the North Western Region Computer Branch. This team provides computing services to power stations throughout the Region. The person appointed would be based at Bramhall but would usually assist in the control room of the plant monitoring and control system at Heysham Power Station. This work would require some time to be spent at the station.

The Region has an ICL 1904S, to be replaced in 1980 by a 2980, with terminals at power stations. The monitoring installation at Heysham is based on Ferranti ARGUS 500 processors.

Applicants should preferably have a degree, or equivalent in a technical subject and have some experience in real time programming. Familiarity with ALGOL, COBOL and FORTRAN would be advantageous.

Applications in writing from either sex stating age, experience etc. to the Personnel Manager, CEGB, N.W. Region, Europa House, Bird Hill Lane, Cheshire Heath, Stockport SK3 5XA to arrive not later than 25 July 1979. Please quote reference number 430/CW.

METROPOLITAN BOROUGH OF WIGAN FINANCE DEPARTMENT

COMPUTER PROGRAMMER

Post No. FC9

Salary Grade AP4-5 - £3933-£4761 + £312 supplement (Pay award pending).

Applicants must have at least two years' experience of COBOL or PLAN. The person appointed will be expected to assist in designing, writing and maintaining application systems for an ICL 1902T Computer. There are several interesting 'on-line' systems under development, and the successful applicant will be working as a senior member of a programming team.

The commencing salary will be determined according to age and experience.

Application forms available from and returnable to the Chief Personnel Officer, Civic Centre, Millgate, Wigan. Tel: Wigan 44991 ext. 46.

Closing date: 27th July 1979.

WES PAC COMPUTER SUPPLY

CAN YOU SELL?

THE SALES AND MARKETING BIT

A CODE OF CONDUCT FOR PROFESSIONAL SALESMEN—PART 2

Dangers of sub-contracting

LAST week we started a three part article based on the creation of a code of conduct for professional salesmen. Here is another set of "10 commandments" for your analysis and criticism.

1. The salesman will not sub-contract any part of his selling responsibility to any agent or third party without the expressed authority of his employer.

2. The salesman will inform the client of any intention to sub-contract any part of the responsibility for producing/supplying the product or service being sold and state precisely what control he and his company will have over quality and reliability. He will ensure that any sub-contractors will be well known and proven practitioners.

3. The salesman will not in any circumstances allow himself to become party to any form of share practice or the use of any selling technique which will serve to mislead or take advantage of the client.

4. The salesman will not in any circumstances become involved in any form of price fixing or manipulation. This includes market sharing arrangements, falsifying tenders, deliberately under-quoting—in terms of price of product capacity—and the commission of additional costs in the form of related supplies, labour, electricity, construction, installation, licences, delivery, maintenance, environmental control, fuel, packaging, etc.

5. The salesman will not in any circumstances be party to any form of practice which could lead to corruption of any kind.

6. The salesman will ensure that the client is informed if a product is being offered which was originally intended for, commissioned and paid for by, another client. He will also ensure that the originating client is made aware of such an arrangement and request his company to initiate formal agreement where none exists.

7. The salesman will not in any way denigrate the character of his company, his company's competitors or any fellow professional.

8. The salesman will not maliciously or recklessly injure or attempt to injure, directly or indirectly, the professional reputation, prospect or business of others by any action he might take.

9. The salesman will not exploit his relationship with any client by using the existence of any past or present business as a means of advertising or publicity without the expressed authority of the client concerned.

10. The salesman will ensure that any 'reference sales' are totally valid in the context of the product being sold to the client, and that such indirect recommendations are made with the full consent of the referenced client concerned.

That's all for this week. I hope by the time this is finished in one week from now you will have generated some ideas of your own on what a code of conduct for salesmen should look like.

TRADER

Readers are invited to comment on the subjects discussed in Sales Bit, or to write about their own experience in the market place. Letters should be addressed to: Trader, Computer Weekly, Dorset House, Stamford Street, London, SE1 6LU.

Extra branches

NEW offices in London and Edinburgh have been set up by Redfern Computers. In London, central accounts, financial and government branches are at Holborn Hall, 100 Gray's Inn Road, W.C1A 1AL. Tel: 01-404 0086. The Scottish branch is at Orchard, 100, George Street, 30 Queen's Road, Edinburgh, EH1 3JA. Tel: 01-332 1310.

Disc care

ADVICE on disc care, from initial unpacking to storage, archiving and protection, is contained in a brochure produced by Eshcon. Copies can be had from Frank Skinner, 100, George Street, 30 Queen's Road, Edinburgh, EH1 3JA. Tel: 01-332 1310.

Distributors

REPORTS and publications produced by Auerbach are now being distributed in the UK by Computer and Management Ltd, 32-36 Great Portland Street, London W1. Tel: 01-437 3691.

Video booklet

FOLLOWING the launch of its Viteonack modular CRT electronic system, video monitor specialists Digivision has prepared a booklet, "How to use your Viteonack", for the benefit of those users whose familiarity with TV-type circuitry is limited. Copies are free to existing users and to others from Digivision Ltd (CW) 82 Cannon Street, Leicester, LE1 7ahr.

Modem

ROBER has added to its range of UK built modems a synchronous, 9,600 bps device, which automatically adjusts to the characteristics in two seconds. With a basic price of around £4,000, the 96 LS1 can be used on leased lines or on the public switched network and can fall back to half speed on bad lines.

An add-on printed circuit board, based on a Texas Instruments 4 bit bit-slice processor and US CMOS MOS LSI, enables four channels to be multiplexed on to one line using interleaved time division techniques.

THE order doesn't matter, but the shape does. To maximise the area enclosed by the four corners should all be on the same circle. This will make the quadrilateral cyclic, with opposite angles adding to 180°. In these circumstances the plot will be precisely 1/4 x 1/4 x 1/4 x 1/4 for 12 square units.

Puzzle Answer

THE order doesn't matter, but the shape does. To maximise the area enclosed by the four corners should all be on the same circle. PROGRAMMING STAFF FOR THE OIL INDUSTRY

The British National Oil Corporation is utilising Computer Systems in a major supporting role throughout its range of activities. The Corporation's computing activity is based on Hewlett-Packard mini computers linked to a central mainframe. A wide range of exciting applications are at an early stage of development.

Opportunities exist for experienced programmers to fill key positions as SENIOR PROGRAMMERS and PROGRAMMERS in several project teams based in Glasgow. On-line program development facilities are used, and there will be involvement with modern data entry, file handling and real time software.

If you:

- have sound programming experience in COBOL and/or FORTRAN,
- are capable of working on your own initiative,
- can work hard within the discipline demanded by exciting challenges in a project based environment.

these posts offer unique opportunities for job fulfilment and career development.

At either level you will be offered a salary which fully reflects the importance of the position. Other benefits include an excellent pension scheme and generous relocation assistance where appropriate.

If you are interested in these opportunities please apply to:
The Recruitment Officer,
The British National Oil Corporation,
150 St. Vincent Street,
GLASGOW G2 6LJ
Telephone No. 041-204 2626

The closing date for receipt of applications is 26th July, 1979.

BNO

The British National Oil Corporation

DEPUTY DIRECTOR

Since 1976

During the summer the year's recruitment is starting. The system of linked computers is the most advanced and powerful in the world.

A Deputy Director is needed to manage the department and to act as a liaison between the University and the industry.

Candidates should have a 1st or 2nd class honours degree in Computing, and good academic and professional qualifications.

A negotiable salary can be offered. Further particulars may be obtained from the Deputy Director, Computing Unit, University of Surrey, Guildford, GU2 5XH, or telephone 0432 71281, extension 422. Applications from men and women to the level of 1st class honours degree holders, including the names and addresses of three referees, should be sent to the same address by 28th July 1979.

PROGRAMMER REQUIRED

For expanding Structural Engineers in pleasant well equipped premises, part time, full time, knowledge of Basic Language essential.

*Must be available, steady, reliable, honest with record.

Apply in writing to:
O. A. Grant & Son Ltd.
Widenedale, Spalding, Lincs.

The Polytechnic of Birmingham
Research Assistant
and/or 1982-1983 Fellow
of the British Academy

Mr. Thomas, graduate in Science Engineering, required to undertake research in the field of computer-aided design. Applications from men and women to the level of 1st class honours degree holders, including the names and addresses of three referees, should be sent to the same address by 28th July 1979.

NORTH WEST VACANCIES

MANCHESTER SENIOR PROGRAMMER
c £5,500
A senior programmer with 2 to 3 years COBOL and some ASSEMBLER experience can enjoy excellent benefits with our client. Latest hardware and systems.

OLDHAM SYSTEMS ANALYST
to £5,100
Our client is seeking an Analyst with around 2 years experience on either General Financial or Production systems. Opportunity to gain wide range of experience and to see projects through in real-time environment.

NORTH MANCHESTER SENIOR ANALYST
to £7,000
Mature, professional Senior Analyst is required by a major North West ICL New Range user. Must be able to motivate and lead staff.

PRESTON TECHNICAL SUPPORT
to £7,000
Major UK organisation with large Distributed Processing network require flexible staff, already at Senior Programmer or Project Leader level, to provide technical support and control overall development.

NORTH WEST MANCHESTER SENIOR ANALYST
c £6,000 + BONUS
Our client requires 2 Senior Analysts with a total of 4 years commercial systems experience. Major systems development and supervisory experience to be gained.

MERSEYSIDE ANALYST/PROGRAMMERS
to £5,700 + BENEFITS
Analyst/Programmers with sound IBM COBOL background are sought by our client. Opportunity to work on highly advanced IBM technology. Excellent fringe benefits are available.

PRESTON SENIOR PROGRAMMER
to £5,500 + BENEFITS
Our client requires a deputy chief programmer with at least 5 years COBOL and a good systems design background. Knowledge of OS/JCL and supervisory experience.

LIVERPOOL ANALYST/PROGRAMMER
c £5,100
IBM System 3 user requires an Analyst/Programmer with sound RPGII background. User liaison and opportunity to see system through.

NORTH CHESHIRE COBOL PROGRAMMERS
to £5,100
Young COBOL programmers are sought by a leading UK organisation, large systems and hardware.

LIVERPOOL PROJECT LEADERS
to £8,000
Our client needs Project Leaders with in-depth knowledge for major developments. Latest systems and hardware.

LIVERPOOL SENIOR SYSTEMS ANALYST
£7,000 + BONUS
Well educated and experienced analysts to work on large scale developments. Outstanding opportunities, attractive benefits.

NORTH CHESHIRE ICL ASSEMBLER PROGRAMMER
£5,200
A young, personable System 10 Assembler Programmer is required by our client. Excellent prospects for well experienced staff.

SALE COBOL PROGRAMMER
c £5,400
ICL 1900 user requires a COBOL programmer with over 3 years commercial experience. Wide range of applications. Career prospects excellent.

LIVERPOOL SYSTEMS ANALYSTS
to £6,250
Analysts with 3 years experience on commercial systems required by company who will shortly update to 2900 hardware.

WARRINGTON ANALYST/PROGRAMMERS
£5,500
Our client offers major on-line development work on ICL 2900 hardware to Analyst/Programmers with commercial COBOL experience.

NORTH CHESHIRE REAL-TIME PROCESS CONTROL
£5,000 to £9,000
Highly professional consultancy is seeking staff at various levels who have gained good Process Control experience. Knowledge of CORAL 66, RTLII and ASSEMBLER languages required.

MERSEYSIDE SYSTEMS ANALYSTS
to £8,400 + BONUS
Our client offers exciting development work for Analyst with over 3 years experience. IBM background preferred but not essential.

PRESTON COBOL PROGRAMMERS
£4,100 + BONUS
Young programmers with COBOL experience on either ICL or IBM hardware are sought by our client. Major development projects.

WARRINGTON COBOL PROGRAMMER
£4,300
A self-motivated COBOL Programmer with over 5 months experience is required to work on ICL TP systems.

MANCHESTER SYSTEMS ANALYST
to £6,000
Our client operates large IBM hardware and is seeking an Analyst with around 2 years commercial experience to work on CICS supported developments. A programming background is an advantage, but not essential.

MANCHESTER IBM ASSEMBLER PROGRAMMER
c £4,400
ASSEMBLER applications programmer can enjoy very good benefits with our client. IBM hardware and latest systems.

WARRINGTON RPGII ANALYST/PROGRAMMERS
c £5,250 + CAR ALLOWANCE
Well motivated, ambitious RPG II Analyst/Programmers are sought by our client offering variety of development work.

STOCKPORT COBOL PROGRAMMER
c £4,300 + BONUS
Our client requires an ICL COBOL programmer with not less than 18 months experience to work on TP applications.

NORTH MANCHESTER ANALYST/PROGRAMMER
to £4,850
Large company seeks analyst/programmer with a good commercial/manufacturing COBOL background for on-line developments.

BURY COBOL PROGRAMMERS
c £5,000
Large committed OP user requires COBOL programmers with 2 years experience on any major hardware.

NORTH MANCHESTER SENIOR SYSTEMS ANALYST
to £7,000
Large IBM user is urgently seeking an experienced Senior Analyst to take control of development projects in both batch and on-line environments.

MYRIAD

INTERNATIONAL DEVELOPMENT PROJECTS ONLY CENTRAL LONDON

Our client forms part of an international organisation that is one of the world's most profitable and fastest growing corporations. Due to continued expansion, they are recruiting three key positions to assist with the development of various commercial systems utilising IBM 370 hardware with database and datacommunications software (a 4341 and 4331s are planned). Systems 34s are intended for world-wide distributed processing. Full training will be given where necessary, as the company is primarily seeking persons with drive and ambition who are ready to accept added responsibilities in a progressive environment.

PROJECT LEADER **TO £9500**
The person appointed will take responsibility for a major on-line database project. An essential qualification will be the drive and initiative to run their own project with the minimum of supervision, coupled with the ability to inspire confidence at all levels of user management. Applicants must be willing to accept occasional international travel and possess a sound technical background.

SYSTEMS PROGRAMMER **£6000-£8000**
An experienced SYSTEMS PROGRAMMER will command a salary at the higher end of the range but the position is also open to PROGRAMMERS seeking to

Generous starting salaries are further enhanced by a NON-CONTRIBUTORY PENSION SCHEME, £3.25 per week L.V.s, season ticket loan and a 35-hour week.
REF S4/2108

enter the specialist area of software programming. The successful applicant will have at least 2 years' IBM-compatible ASSEMBLER, ideally gained at a DOS/VS installation. He/she will be heavily involved in the design, implementation and maintenance of integrated database and telecommunications systems. Knowledge of CICS or DL/I would be very advantageous but full training will be given in appropriate areas.

SENIOR PROGRAMMER (RPGII) TO £6500
Applicants with sound RPGII knowledge are required to develop a number of very interesting projects that will be implemented on a network of System 34s. The machines are being located initially within Europe, but plans to extend the network world-wide are well advanced. This position offers an excellent opportunity for an ambitious person.
